

The mountains of Moonglow Ridge.

[Previous story: Drunken wish power The Fellowship to Pebbleton. Warning: this story contains, Futa, Cock&Balls Inflation, BOObS Inflation, Futa on Futa, Pregnancy, & Vore!]

Zach was now still grumbling it's been over several weeks since they've done their journey several months of past actually Currently in Rexland. {They have 12 months just like us but their months are called lands, This used to be a reference to the fact that it took a month to travel to one land to another on ships. This was before the invention of airships and riding on Dragons or even of the gates it's just your coincidence that all 12 months are named after 12 islands that work in a good four to five weeks exhaling expeditions you have nothing crazy happened} “It's the second week of it I now the tournaments of the queen is done and she's probably taking her route through the tower as we speak?” Remarkd Maya now pulling the cart the bear now being exhausted.

“Well let's see it was during witherland, This time for the tournament for The Queen's so see if it's the tournament is done 18 birthday, Of the princess or of the request of the wizard and I believe this time was the request of the wizard wasn't it?” Prisca asked Looking down at her slightly grown belly and doing a quick math she was not going to have her kid on the same day as the Queens which is a slight bummer. Zach mumbling a little bit of yes. “So are we going to go through the night to climb the ridge or not?” Looking at the mountain ridges it was still daylight so the signature glowing effect wasn't that noticeable of the ridge is giving it a signature name.

“Well I do know of a mine that can go through here a little bit so it will take a couple of turns and hopeful navigations but we can navigate it. Decreasing our chances of getting attacked and us moving faster and also we can have Harkon. Continue palling instead of setting her free around here.” Prisca remarked, Remembering Daddy's mine. They gave a slight nod as they were navigating towards the entrance of the area slightly limp eating the deep foresty woods that were flanking the pathways. Finding the entranceway to the mines it was slightly dark by the time that they reached it.

Now the mountain rage was demonstrating its signature name giving off the beautiful silver glow illuminating and featuring several parts of its cratery entrances also with its slight glow it was starting to feel like the area was a lot lighter due to its large deposits of gravity stones whenever the moon is shining light on it extremely well it activates the stones causing the area to feel like you're walking in a very light area making transversal of the area dangerous actually because you could jump into areas where gravity is surprisingly stronger and suffer a great strong fall damage or if you're not careful you just step into an area where one section of the ground is light gravity and then all of a sudden thrusting crushing power granted inside the mines you wouldn't feel these effects!

Prisca Exerted mystical energy around her body Using her humanoid disguise to transform herself Into a smaller Of a titan the giant species of the elves covered in gleaming glowing metal or vibrant glowing rocks it's in illuminating moss of green. “Granted the side effect of my illusion magic is not going to actually make me as big as one of them thankfully, how roughly big do you think the dragon egg is going to get?” She said wondering bringing as she walked into the cave illuminating its exterior. Miste slightly with a chuckle. “Don't worry we can still carry you in the wagon long before you have to be bedridden.” As the two were going to be in charge of the reins her dragonic eyes naturally slid to have great visibility in the mines.

Unknown to them mysterious sludge was stirring the form inside the mine!

[Here's the boss creature stats if you don't care skip:**Malice Guardian Woods**

Tier 2 Solo: Move and tactics: Confusing, Unpredictable, Insanely territorial.

Swirling sludge given foreman life the result of When sage and dread mix together into dark magic chick of untold evils looking like a giant worm of dark energy! Crafted out of spines and tentacles

ATK: +5 :Slam Melee : 2d8 Physical and magical

Difficulty: 14

Thresholds: 14/26

HP: O O O O O O O O O O

Stress: O O O O O O

FEATURES: Expertise nature, fear, and death+3

Passive features:

Gloom mold: If a target receives damage only the **splendor** Domain can heal it off or a long rest with a **splendor item**.

Resistive nature: Spells from **the sage** do not do damage!

Aftermath: Unleashing damage STD6 Phy across the field upon death! Reaction role greater than 15 cuts it in half.

Divided body: It costs one fear to attack two units spotlighted.

Active features:

Sludge Wave:Mark a stress: inflicts3D6 damageMgc and has a D10=10=Poison the target. {Standard attack roll}

Leech Tentacle: spend fear: refillsHp:D4!After dealing damage to an unit roll for basic attack!

Spawned oozing Tentacle: stress: Summoning a 3 health **Thorn Tentacle**, To attack the nearest target!

Tentacle Wrappings: Spend a fear Make a **Spellcast Roll** against a target within Far range. On a success, roots and vines We'll wrap around the target in question , dealing **1d8+1** physical damage and temporarily *Restraining* the target { **Strength Roll>13 Break free and do damage** }

Towering 'Stalk': Mark a Stress to use this attack. Make a **Spellcast Roll** against an group of adversaries within Close range. The erupting stalk lifts targets you succeed against into the air and drops them, dealing 2d8 physical damage! **Spin three fear**, To do 2D6 worth of damage to 1 target extra!

=====

Thorn Tentacle:

Tier one: creature

ATK:0 :Slam Melee : 2d8 Physical and magical

Difficulty: 10 Thresholds: 7/16

HP: O O O /Stress: O O

FEATURES: Expertise nature, fear, and death+3

Passive features:

Auto slapper: Whenever a player takes the spotlight this attacks force them to make a **Reaction roll** if it beats it's difficulty[10] you have avoided the damage!

Relief of death:Cleared the stress of the person who land the final blow as well as Remove two stress from **Malice Guardian Woods!**

Active features: {Are all the same as main creature UP above!}

[Now here's the battle]

The sludge was activating the roots along the cave walls as the cavern was slowly surrounded with branches and vines. “OKI think we got Element attack but I don't know what it is?” She remarked and she dropped her transformation! not purpose it was just too much energy to maintain. Zach now down to a healthy large K, Was leaping on to the bear. “Okay any suggestions on what this thing is?” The first tendril summoned out of thorns nearly struck Zach again the bear but missed her completely. Zach spinning her blade even slashing seeing the tendril she'll out of quick reflexes. Miste quickly looking around trying to see if she can find the core of the creature. While forming the water in her hands.

Symu First off activating her demonic aura the horns along her head were starting to reform back into the ram like shapes Spiky forming along her arms and legs! Followed by Maya jumping out of the wagon as well. Wielding her blade still shaved and going for a quick attack towards some place she thought had Enough vines to qualify as a mass & was successful! The wind blades were slightly of a glimmering purple. Zach remarked. “Hey those are from the midnight domain!” Kathy's ax Mistriking a area slamming into the cave wall! Vines bursting out of the cave wall grabbing Kathy! Stabbing and lash rating and squeezing!

And a series of tangling vines burst out underneath Maya as well preemptively wrapping and binding her pulling her serrated blade down!As both of them were trying to break free for the vines but failed Miste firing her water blast and misting. “Darn it I didn't see the core correctly!”As a tendral oing out from underneath the wagon grabbed Miste from the legs things in wrapping both of her tails! As the tendrils got stronger and wrapped tighter around the others!

“Sammy you'd focus on finding the core I'll cut the girls free!”Zach said formulating a plan!She first off spotted what looked like to be a swirling massive dark energy plunging her fists in flames and said she punched the rock face she's of that area! “I think I found the spot!”Meanwhile Zach did his first slicing with his blades to the first tendral Cutting Miste Free!Symu Quickly raised her leg into a whipping kick instead though she whipped Her Cock Smacking it with more flames and fire! As Zach was about to cut Maya if free she was slammed across the wall as trickling liquid was drained! Thanks to it moving just as she was cutting it it didn't get a full cut.

“FICK THIS!” Miste shouted swirling the energy in her hands! As a portal appeared in side the swirling cord toxic ooz Symu Was smacking! “Leave us alone!” She responded! “I pick up what you're dropping!” She said as her fist was now swallowing with fire and energies of Divine! Punching the core into the portal all of the swirling vines were sucked in just as Zach was cutting free kathy! The portal closed immediately afterwards as the creature was ejected from the battlefield! “Fantastic idea now where did you send the creature.” Miste shrugged her shoulders she has no idea where she sent it! Honestly she didn't even think that creating a portal inside a creature would actually work but it did!

“Well let's keep going!” Zach said quickly try and fix some parts of the wagon the wood was being crackled and bent the downsides of having a makeshift wooden wagon was it was not built to last for a long journey metal wagons were longer lasting more durable and could also withstand a couple of harsh blows while the town actually didn't have that many bed fights this was starting to show its signs.

A day later.

As the group came across their first fork in the road and a couple of minecart rails sadly none of

the carts. "I believe this is the correct path." With a bit of a shaky tone in her voice, But they did follow the rails,As now there was some small lights sunstones were Lining several key areas of the mine making it no longer that dark. Kathy was looking over her injuries from the battle and they were not healing up and they were starting to show signs of the black mold same thing with Maya most recent injury. "I'm no expert but I'm pretty sure my is not supposed to be black?" She said poking her darker areas is of her slimy body. Using her holy energy, she in her hands,Lightly rubbing across her Cock,Getting only a small trickle of liquid and rubbing it against the wounds it did clean up the injury but not by much but luckily Maya wasn't injured that deeply. "None only did, I fail on getting a decent load I don't, think I can heal that much after a while we might have to do a long rest?"

Turning to the group inside the cave, "Okay once we get to the next mining junction we'll stop and take a long rest we can camp for the rest of the night." Prisca looking slightly ok with the idea maybe they can do a better job of patching Up the work. Which took them not that long. This cave junction was a bit more set aside with some pickaxes Left behind. "So why did the mine become abandoned?" Maya asked looking around while patching up a little bit of her own armor not picking up on the subtle facial structures there's a Prisca. "Well to be honest it's mainly because it's easier to hunt for the animal prey, than it is to mine in these mines so we turn to more of a farming setup. Then digging into these minds we mainly use them to help build the dam. the wood ones kept on breaking." "ohh so you were a farm girl too." Maya responded now taking a seat onto one of the less misshapen rocks. "Oh yes my sorcery skills were very interesting developed some new tricks that been dying to test out but, I can't really risk going too crazy."

"Oh really?" Zach now's chiming into the group. "Oh yes technically I could probably do the spell here but it's too risky after all we just did a hard battle and also, I'm not sure what spirits I would be summoning?" As the two former bandits look back and forth. "Oh not to worry, I've only been practicing this spell with the aid of our priestess. Tyson really makes sure this is not me diving deep into the darkness. Although, she does say that it's really high level! So I shouldn't really cast it just without some major assistance." "Ok?" The two responded slightly freaked out by that. "So how did you two meet those two?" Gesturing to the dragon elf in the demon. "Well as the classic saying goes of how most parties meet up either a in jail or B in a tavern or C it's both the answer was both." Zach said with a quick bluntness.

Flashback {Wavy symbols}:

Nat Tossing back some apple beer as they were all sitting around drinking being at the tavern having a toast. "To MuSsm! May she rot in {Hiccup} The laps of the great rat." Skim Said slightly drunken and in her mystical aura slowly showing signs that it's getting weaker. Zach sitting with a big huge 'rod' shoved right up into Maya's human form. "Yo let's be sure she's actually having fun with those cats instead!" Nat tossing another drink. "Well I'm sure she won't be spending too much time ma was always sure to keep a couple spares of herself around." Zacks dropped the glass and immediately spit in the back of Mayas head "really?" "Yeah she has a spare in the old town several weeks away I think maybe a good month and then we'll soon see her start coming back into her old the little old lady ways." The two bandits looked slightly nervous.

"I'll start making Bone calls to my cousin to double check on things." Grumbled Claire now looking directly at the two who were extremely obvious her scales of green glimmering. "Cousin Claire rebel what are you doing here!" As Miste scootover and sat right next to them claire's jaw dropped "what are you doing here you rich asked pump? Just because the headbanded Queen is currently dead

doesn't mean anything these two are stupid it's and they're drunk too!" Turning to look at the rats as they were slowly getting ready to grab their weapons.

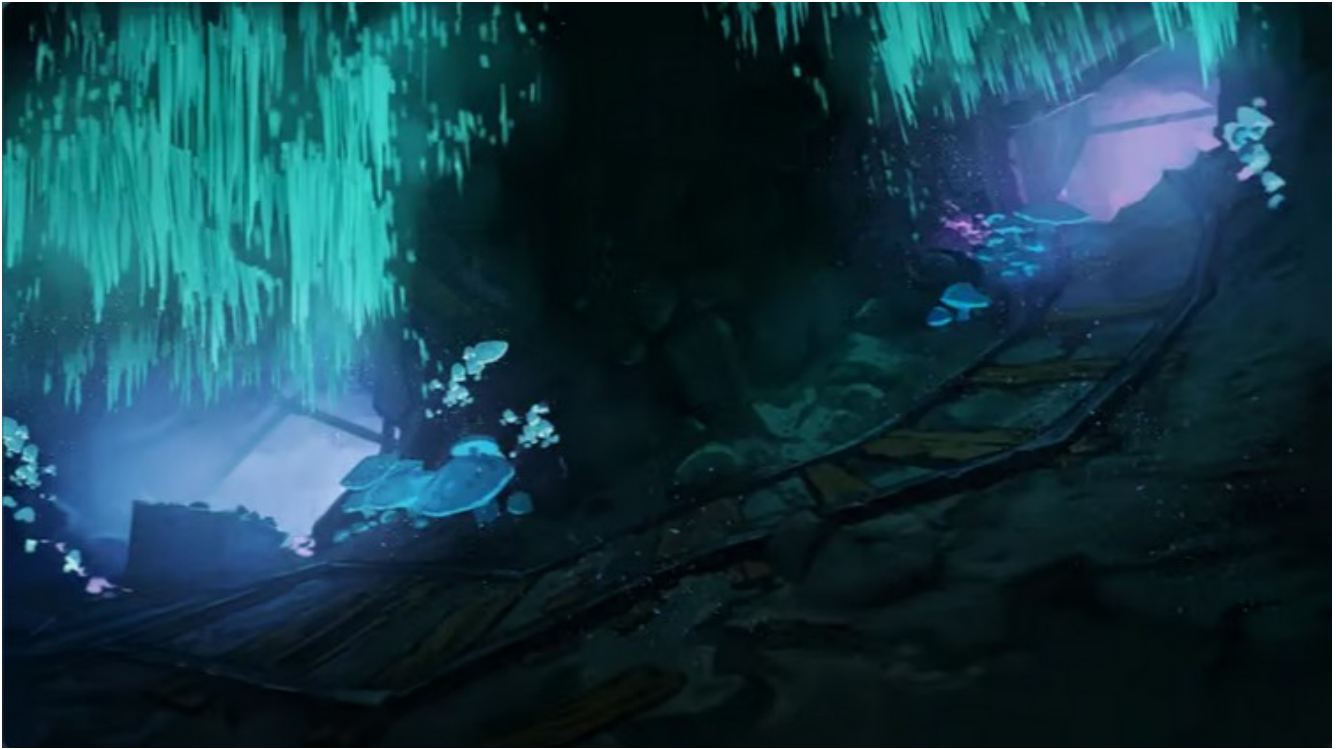

"Oh well I thought you might be coming home soon so mop sent me to pick you up hey S*SD!"Miste jumping backwards and getting ready to prop for a mystical staff usage as spells were slinged tables were tossed Zach and Maya tangling round and helping out Miste staying Claire. "You three get to the tree as fast as you can you know the one and take care of future problems! Also Zach if I see you again you better show me the head of that rat if she's brought back if not you're going on my wall." Zach gave a bit of a gulp still running with Maya attached to her crotch, Miste blasting with her 'staff' As the three ran out of the tavern. Zach running towards a tree. "Okay, I have no contact in the next town so we're going to be having to do this all by ourselves." Zach remarked jumping into the tree and grabbing Miste by the neck.

Crown Peak Park Ancient forest Her tree grows opened and glowing or it should say a tree int. "Sweet mother Burrough when did I have nights with a human, human and a dragon? Wait a minute Blue scales pointy ears you." "You know this tree?" Maya responded and Zach was slightly shaky in her head. "Also I think it's time you can stop Fucking Me in ASS!" Zach also realizing she forgot all her gear.

Paused during the flashback

"Oh yeah you're telling them the story about how you nearly killed me." Symu Interrupted as she sat down next to the group, Giving Zach a good nudge in the elbow as the others shot down next to listen. "Will it be fair it's not my fault that half the town clergy as demons and the other half aren't and Reds a common coat color." Zach giving a bear a remark. Priscilla turned to the remaining adventurer and said. "don't tell me Zach try to kill you too." Kathy responded. "No, I hired them to help me clean out my mothers house and she turned into a zombie also the priest that was working with us also turned into a zombie we had to kill her too."The three looked kind of sad and guilty assuming that Zach's routine was to just be murdering everybody in becoming friends that way. "No but that's how, I didn't meet Matt.If I'm not Fuck With you one way, I'm doing it the other way." She remarked.

Symu Gave a very short version of her half of the story, Showing off her mystical skills by throwing a fireball at a naked Zach granted it was a small fireball so it wasn't that great while slamming her fist across the neck of another teammate and using her tail the slam miste she'd crossed the wall creating a ruckus inside the church for the guards to come in. One week later they were set out on bail. "And that's why Miste owes the church a lot of money,Oh when the old rat did die she was not contributing enough so when she missed her payment and it wasn't listed of her death as a result of it the kid was eliminated before becoming a kid." She finished explaining. "Yeah but I was right on who was going to be the one carrying and delivering." Zach remarked looking directly at Symu. Kathy "Wait so you were training your mystic skills no wonder you're so good with your valor."

While navigating through the mine, The group were swapping stories and tales. “J.K. Elijah, Was your mother oh man we invited her just a few Lands ago.” Prisca remarked shaking her head. “Really, I guess your letter arrives a while back, because we didn't receive it so it had to be before she passed.” Kathy responded. As the wagon was slowly still looking like it was getting more and more tattered the cave walls didn't help it as the moistness of the caves were starting to affect it and unlike people that mold was not going to get removed without heavy retooling a long rest for a person is almost a day for object that could be a week and they don't have time to dilly dally on that.

“You know I have a idea to make this last a little bit longer if we can't find it when the old minecarts?” Suggested Pilow. “Okay what's the idea?” Exclaimed Maya. “Well Kathy is a cleric brent did not have the same order but she could this with her holiness for a while we can just write in a pool of it for a while?” The wagon was already pretty tight anyhow so and now it was getting smaller because they had to stay away from the mold which was really hard considering that was also growing right where you sit in order to pilot the beast normally. “Link it to our next junction hopefully we'll find a minecart if not I'll get started.” She said with a sigh. Symu “Don't worry I'll contribute just because I'm not practicing my healing magic doesn't mean I'm not proficient in it still.”

Luckily they found a nice good mining zone there were several minecarts and even some processing forges. Maya was the one who was successful at finding it! “Well since we're inside a cave, I don't think we're going to need a hood do we?” Remarking Zach really not wanting to shrink down just yet. “Runhild “I don't think so but I still think we should have the cart bless just to be on the safe side. After all, just because of iron one, is a bit more durable! Doesn't mean it's going to survive a strong blows.”

The two gave a slight nod besides they need to prep the bear for a possible battle as well. Both Kathy and Symu, Stand on either side of the wagon in the metal and steel gripping their hands around

Cocks And placing them inside the wagon. “Avidus,Avidus,Avidus!”They chanted going Up and down Up and down,Their hands glowing golden spewing from there Dicks,Golden Holy 'Milk!' The two girls now covered in sweat. “Okay, that should cleanse the thing.” Getting new bindings around the Bear in question as the bear was given some armor

“Now there's only enough room for 6 people to fit inside the wagon Comfortably Which means two have to sit out comfortably.” Stated Prisca. “Or one of us can get sandwiched?” Remarked Zach with a bit of a smile because technically that could work. Runhild: “Well one of us should continue Riding on Harkom, Which I can do.” Zach with a bit of a giggle. “And that's how we get Werebears!” “No but then that answers our question of what your goal is.” maya taking off her sheath revealing Dick 15in Now in length still 4 inches thick. “Ooh wearing it did make my chunk get bigger!” Zach getting slightly in position. “Then impale!” she did greed with a strong Thrust of her 'blade' Into Zach causing her belly too plump,A little as Zach gave a slight moan! “NOOOWW, WhooOoO IIIII FuuuuuKK?” She said as she sleighed Maya into the back of the cart first.

Symu Slammed her cheeks onto Zach's with a bit of a hard slump,Giving her belly a bit of bounce so that dirth girth that she slipped in. “Well if we're turning into a Fuck Tub we might as well finish it off. Prisca said she shout big fat 15 inch long and 5 inches thick COCK,Into Miste's Vagina! “Whooooo I thOoOught yOOouuu were going to be very picky about who or now since you've already got one in you might as well see if you can plunge 1 out?”She said pushing Prisca to be in the back.As Pilow was forced into the back,Landing her cheeks on top of Miste's 'Staff' {13InL3in thick} Kathy squeezing in between the rest. “Okay let's get going!”

Throughout the week.

The wagon was circling through riding the rails bouncing, jiggling, thrusting & CUMMING! They managed to avoid going into a lava filled cavern by a few inches on Venuday!Twisting and turning a full day through it with each bump becoming a pump pushing the limits of the cart's thickness and durability! Eterday Came across a dark outcove perfect for them to take a quick break since it was still close enough to being a hot area yesterday for them to go through Cum Became a very foul smelling hot tub for a little bit. Not to mention someone needs a bit of tlc “You're such a good girl Harkom!” Runhild Smiling as she coded her hands with healing breast milk,Forming slicing claws as in scratching off the itches she isn't petting while also removing the scars and injuries.

“That's an interesting technique for healing I've noticed that removed both injuries of burnt Bear paws?” Kathy remarked taking a deep breath,Not being smothered by Zach, who is taking the time to 'reduce' and also repair it a little bit of the iron cart. now down to a small m. “Oh that's our village's technique you know I still haven't figured out what Tyson's class is she uses splendor and sage domain don't know what would qualify that one?” Remarked Pilow slightly poking Prisca's belly and biggg Tiits! “Really weird? Maybe she's a multi classer.” Remarked Kathy and she knows Zach was just finishing up with the touch ups. “Okay it should hold up a little bit longer so are we going to do the same 'bangerjobs' or are we going to switch them up?”

Pilow”Personally! I hope we switch it Up, some of us were just being 'slotted' For an entire week.” Maya easily slipping back on shave. “Still not full length of the blade not to mention some of us were going for a very long time, oh my Nutts!” Prisca poking Zach's belly a little bit, As it was still going down with the excess liquid pouring out. “How is it that you weren't eaten through with that stuff?” Miste explained while also flattening down a little bit. “Most monster races have the ability to

control their monstrous stick abilities. After all thanks to Zach's little 'cursed' thing we still don't know why Zach hasn't started biting off people's heads after having fun time." "Ha ha very funny are we doing the switching or not." Zach giving a slight look of annoyance.

"How about we rest here for the night and yes we'll do the switching we can play a game to determine who's giving a sandwiched this time around." Exclaimed Symu. Pulling out some soggy cards from her back pocket they still reeked and smelled of their exploits as the cart was also starting to have dry sticks of the semen lining the rims. "Good because I don't think I can refill the thing right now anyhow are we revealing the tub or not?" Remarked Kathy slightly worried that the answer was yes very feeling it. "I think we're good for right now besides we might need to save it for when you need to bless the area if we weren't that creature again."

"So that means Kathy, me, and Miste should give out the questions to make this into a proper contest." Remarked Zach being very clever with the idea if we're going to make it a competition let's not make it something as simple as rock paper scissors but actually a trivia contest prepping the group for possible situations later and also this way She can sneak in some key questions for the job. "That's a brilliant idea, let's start off with a simple one." Remarked Miste: "Do the barons have to follow the same royal rules as the princess and Queens, even though they have lesser areas to reign over?" Everyone quickly responded with a resounding. "yes." With Prisca going into more detail "Often you're still in the line of succession so you need to take prior example and this is to teach humility to the future rural as well as establish that you have the trust of the people by trusting them not to kill you or 'other things.'"

"Bingo OK, Zach how about your next question also what's the goal number?" Miste responded with a bit of an interesting inquiry. "Ok, first place is the one who gets six questions correct in a row, First place means you'll be in the Dumpstered and Pumping section at the same time." She said with a bit of a cruel function. "Now for my next question, Since Misty played the role of political question which is normally my wheelhouse, I guess, I'll go with her wheelhouse magic, Our world's magic functions on the 6 elements clashing and fusing together but we also have what are called domains of studies the methods of practicing and channeling those six magics which one of these are more dominated by these domains. Dark magic?" Pilow "Grace, Sage & Bone?" Maya. "Grace, dread & And arcane?" Symu & Prisca. "Midnight, dread and Arcane." "And Pilow Maya have dropped their win streak but they could reclaim it!"

"What thoughts are considered dark in each Major religion, bonus points view list each one of the gods?" Kathy being very catable, To borrow a phrase from one for friends. "Guardian VS The Virtues and the Truths. [Symu]: Which covers both the major of the human religions as well as the demonic religions." The enemy of the Unicorn is the Gorgon sisters. [Symu: "known they are the triad of Medusa, Euryale & Stheno!"] Tiamat and Bahamut versus the Great Beast of the sea, Representing the elves."

"Well should we count those as individual bonus points or just one big bonus point showing off that she's a church girl." Remarked Zach, Kathy responded. "1."

"Well then it's my turn for another question, Ducis-Educo, Decorp & Vas Rel Por, Are all spells belonging to what magic domain?" Miste said purposely not channeling any mystical energy into those words. "Arcane!" They all answered with a little bit of another attempt for bonus point. "Technically two of them are the same tilt rotation spells just one is more or less a stronger version than the other as Vas Rel Por is actually the teleportation spell to create a gateway through dimensional realities. Sneaky

though you slipped in the killing spell.” The little demon sneaked.

“Well looks like our demon girl might be having the last straw for the first one, I think this is time for a good political question. Each one of the healing classes also represent one of the political churches. The Church of the Avatar is of the Seraphin nuns As was the Oracle's of fortune. But what tactical class sub ratios do they prefer to utilize?” I know the demon girl's gonna get this one right, And Maya should get it right thanks to Kathy being with us. But I doubt those two will get it right unless there is something involving with those classes.'

Prisca and Pilow: “Divine wielder and Delphi.” Maya & Symu: Divine wilder and Delphi.” Zach smiled and replied. “Well now we know our Demonic girl is going to be the center first. Now we just got to figure out who's going to be our next one so take a seat and we'll figure out who's going to be sitting next to you.” Symu Smiled with a bit of a perk as she gave a bit of a thumb sticking out. Kathy gave a slight look at Maya. “And since the witch represents the elves and the Druid represents the monsters when that comes to their dominant religion aspects but if the witch happens to have also the dread domain underneath their belt which is considered evil for dipping into darkness or considered good. Or is the darkness something you ignore or is knowing thy enemy more important?”

Maya “The best way how to defeat your enemy is to know every ounce of their body and analyze their plans besides knowing the veils is always more important than being afraid of it.”

Prisca and Pilow: The oracles dig into the arcane and the arcane is also in a domain of darkness so if we were to place that we would also be suspicious of Oracle but we are not it's just one of their many tools sometimes you have to use the weapons of your enemies in order to analyze the weapons so if you're allies.” Kathy was very tempted to look and see if they were copying Maya's homework and they were not but this was a draw.

“I guess, I'm gonna have to be the tiebreaker again. Light and dark are often allies, They are two faces on the same coin so if there are three domains of darkness what are the three domains of light?” Maya “Splendor, Sage, Valor?” Prisca and Pilow: “Splendor, Sage, Blood?”

“Okay Maya you're gonna have to set this one out we needed another tiebreaker front or back?” Mist said with a snap of her fingers, She knew this was a stumper question very few people know of the blood domain that's the point because it's the one that's the closest to being on the edge technically she was expecting them to say dread because those are the two that are on the edge of the coin in reality when she refers to the coin analogy it makes sense if you think of it as two halves of the coin are dominated and then there's the edge the one that will split into one side or the other. “I'll take the back.” Maya said giving into position slightly grumbling but she had a bit of a plan. Symu's Dick Was inserted into Maya BIG FAT ASS!

“RunHild could you help me out with this last question? Because this is a question that's slightly in my wheelhouse this is well but politically it makes more sense. If I know more about the politics of your village.” Zach said running close to the wizard. As the two walked into a corner “What's the name of your religion?” She whispered into hild ear. “Charon Shepherds”

“As stated for my friend light and dark are on the same coin and we have two faces, Each side has a bleeding rim in theory you could have said dread for that bleeds from the arcane to splendor but midnight is the shadowy darkness that blood is spilt that bleeds into the sage of all things that are living. So my politically charged question is what are the mystical taboos of sage domain?” “Manipulating the dead. Is often considered that rule although sometimes plants are never living so

who knows.” Exclaimed Prisca. Pilow: “Mind control?” Zach raised the eyebrow on that one but ok technically that's not possible with the sage domain without being utilizing the grace domain and even then that's only on animals takes a lot more will to do that even to A were member of family. “Well of course the wealthy princess would get this right.” As the 6 Gotten to their 'positions'.

“ Prisca, Is there a particular reason why you keep trying to 'stab me'?” Remarked Misté. “Well I figured, if I'm going to be having a dragon, I might as well make one.” She whispered back into the ear of the DragElf. Symu Giggling at her new positions, “Enjoying it Soldier girl?” Pilow: “I was expecting your other friend to be involved?” “Well I can always be done by Zach at home why should, I take the pleasure away from somebody new?” Meanwhile Zach was sitting in the back doing the princess this is the village supposedly at least she was rich enough but obviously not largely enough or else she would be walking around in her birthday suit. “So oooooooooo, How did your village get commissioned as existence?” Maya inquiring knowing the rules that there's only two types of villages those are created by Lords of the royal family or high ranking adventurers, Her earned enough to make land. “Pebbleton, Was fouuunded bAAAAy an aAAAadvennnnturer a long time agooooooooooooo! Eleeeeeectrrrooom!” Said the rather plump and prairie pregnant Prisca.

Once again the wagon was jostling and gizzling, the rails bouncing it all over the place. Each bump of the rails caused thrusting them pumping enlarging the bellies of those who were getting them FUCK! The creaking of the metals the pounding of the steels the swellings of the bellies the leaking streaks of access. The plumping of chests the larging of bellies the moans and groans throughout the reels of the rails days upon day the's thrust and bumps! The bouncing of chess the Wiggings of bodies. Pilow: “ PPPebBBBBbLLLLle, Was aaaaaa amaazzzzazazing SwOooooOrrddderer” Guuuuuurrrrrrgggle, Where the noises coming from most of their chests there Nipples With the exception Zach's was leaking, Copious mounts of their milky fluids as the smell of burning and sizzling warm milk trickled on to the hot rails along with mixtures of their huts steaming CUM!

“OOOOHHHhhh MYYYYYYYmm Suuuuvvvvyyysiiiss?” Pilow, Shouted spewing a big load leaking out a good chunk In Symu. “I'll doOO Ahha cheeeeeeck and theeeeen IIII'll SSSee if, I should charge you?” Kathy who was the only one who was not getting bumped but was having a hard time hearing thanks to being smothered by TtitSS! With scrambling to think what was the gods she just heard's name she knew she recognized it from somewhere but it was just nagging her in the back of her head and she might have misheard the name it couldn't possibly be that one, one of the lesser dark ones but still a dark one.

Merday: The rails were getting creaking and bulking Zash's 'pillows' were getting way too big to be noticeable please separating from everybody else's, And started developping some unique traits as they were slowly developping hairs along its bodies? As it was getting harder and harder to go through the tunnels now the crystals shoving deep into the furry parts of Zacks swollen Tits, The fur was matching Zach's lovely red and blue hair with the blue streaks coming straight from the Nipples, The blue streaks make it look like that there were little legs curling up on them! “This strangely feels very good!” Zach's remark, As the bear was pulling the rug a fur or scraping across the gemstones and in mountain mystic wall! The squeezing slowly started to create tiny strings of silk, But the trails were not causing it to shrink any faster just slowing down the growth!

The next day:

They reached the exit, Of the mines the rest of the group could not see past is that except for Maya and Misté, RunHild was also watching Tyson Genovefa, Unusually spiky red hair with our vibrant body markings things along her back as they got a quick glimpse of her [Tits:43.18Cm{G} :

Dick:16L 6inG] With only a skirt of white covering bring her body! Cock Was stiffened like a pole with a series of rings attached to the tip dangling and jiggling! “Straight the guardian to its left!” She shouted ordering unusual sorcerers there's dressed very similar to Prisca, Only with more commoners robes They were using actual rods of ice spells blasting spells of ice cold wood on the swirling mask of darkness that was now forming a tree oh the tree guardian that was following them! “Leap backwards I have a tool to finish this thing off!” She shouted giving thee order swirling in in her hands was a small bead of blood Tossing it directly into the area the tree the tree starts to burst into flames it's boiling energy as it screams a god awful whale. Whence the bee disappears she signals two nuns wearing their standard whitened uniforms but only with their exposed. Them sporting F,They were coding their hands with the white claws of milk of the golden energy Do for doing a fierce slash it's with their bare hands tearing the tree to senders.

“Excellent quick team get ready for another fight another beast came from the mines, Wait Runny?When did you get a pet bear and also what did you pull out of the mines?” As Maya slurped out of thee minecart. “Yeah sorry my friends and I haven't had time to rest up we'll talk more later at your local tavern if you have one available for us we were hired adventurers to help out with your plague problem our priestess is currently being smothered.” As Tyson could see now a human hands sticking out from the mass of blue and red fur? “Ok this way I will leave my students to finish taking care of this mess?”

Once they arrive at the tavern.

“ Prisca, You look like you're about to blow, what happened. Tyson remarked seeing the heavily pregnant sorceress. “Long story short I'm kind of messed up on my treatment and now a dragon goddess is inside or an Arist to a dragon goddess.” Expecting Tyson to be completely angry and fierce but her eyes slightly with the purplish glint leaned over and smiled. “Ah and the Dragon Goddess says you can't get rid of makes perfect sense honestly that's the good thing if we do need to eliminate the dragon but we can't eliminate the entire horde that worships the dragon. Then maybe they can worship your dragon?” Giving a slight belly rub. “So you're not upset that we hired a Ony demon,A gelatin And Kilsy?Along with two humans?” “The one with the fuury Tits Is a human are you sure it's not Werespider?” Replied the priestess giving a slate crooked tinge. “yes.”

“Curse, It's a very very long Story. So let's take a look at several of your closest targets this is gather more information about what's causing this curse to spread?” Maya taking a quick seat next to Tyson, Kathy also taking her seat as well. “Of course Garyson Gloomhorn, You come up first.” Garyson: Short brown hair a little sickly looking her eyes green with a slight reddish tint,Greenish veins loading early across her arms and legs her fingertips blackened her skin tone pale and white. “Oh jeez, I didn't know the curse was getting this strong on her.” Prisca remarked. “About two weeks ago Chrissy turned, I had to use a couple of arrows on her myself.”Looking a little bit sad putting aside her bone crafted bow and taking a seat. “I wish we got back here sooner then if we could have saved her.” “Don't push yourself I know you died your best princess, I mean you're not actually princess, but you know what I mean.” Garyson started coughing harder and harder drops of blood came out.

“Okay where have you been getting, sick from is it from drinks is it from a certain location shouldn't like a regular hunting ground what's the effect?” Kathy inquired. Gloomhorn nodded. “Well I guess you could say it's more or less our hunting grounds and while some of our best creatures there's we can't raise effectively their food is deeper into the mountain ridges so we can't just raise them here in the village so we have to have groups go with them to have them graze in the 'safe zones'. You probably already heard of the toads attacking us and along with the lizardy people.” Looking back and

forth and trying not to insult the elf who wasn't paying attention thankfully she was too busy sheering and chosen sling the groups. "So far water supply hasn't been tainted though so we've been lucky and our grain supplies, We's from last harvest are also clean but we're worried about our next harvest."

"Can you tell me more about the hunting grounds?" Kathy asked. "Sure uh it's kind of like the minds you just came out of a full crystals but not as heavy with a gravity ones uh it's predominantly dominated by let's see we get a lot more fire & Lightning gems And the crystallized Mana is heavily enforced there. And sometimes we collect mushrooms from that area as well." She tilted her eyes and said "mushrooms?" Tyson quickly responded. "We use the red moss mushrooms for a potion or two and a very fancy ritual that I've set up to enhance certain strengths with this ritual I can have my hope energy last for two days at full capacity but there is a bit of a downside with it all those who are in the area who are get hit with it are underneath a heavy suggestion spell you get full hope but you're heavily suggestionable."

"So basically you can be underneath mind control while also being fully powered how many times have you used this ritual?" Kathy's slightly nervous. "Oh the suggestibility only lasts for one day so we're good I make sure that I only use this effect with myself and maybe one other person and that's when I'm testing the enhancing boosting spell effect it costs roughly six points of mystical energy and I would be completely drained it allows me to upgrade my nuns abilities to do the slashing clause of healing energy instead of the standard healing hands technically it takes three but I have the craft spellbook so it took all 6 in 1 day so that way I don't have to use it all the time. And that's how I found out that keeps me full for a full two days instead but two days is not a lot to keep morale going and I don't want everybody suggestions so it's only me and maybe one or two of my assistants and we're locked in the room after we're given one particular task."

Symu Sliding in to help out with the interrogation as well as that little statement peaked her interest. "What do you mean enhance exactly?" "Well it's a unique ability of my training I can either fuse two domains together or combine a higher level domain with a lower level domain but it costs hope to do this spending the faith that I've generated within my soul to enhance someone's own domain abilities her's spells. If I craft a book I can make it where everyone can gain that ability. They are trained in the same class. Or classes that use those domains, I should say. Tyson quickly responded giving a bit of a side eye to the demon girl.

"Look I still worship the avatar as much as everyone else does we don't know the name of the avatar we don't know who the avatar was all we know is some minor descriptions the Avatar was blonde headed and blue eye and that was all we have of clues."She said with a glimmering tone. "Of course of course. Gary could you continue telling us more about the effects, I'll try treating you again so that way you can try lasting a little bit longer." Tyson quickly generating the similar Claw like markings around the shoulders there's of Garyson.

"Have the frogs captured any of you while looking for these mushrooms? And is it possible for them to know this ritual?" "I don't know about the ritual itself but we have had several sicknesses caused by, We were picking the mushrooms by their arrows?" Gesturing to show some of the back she normally wore a backpack of a barrel there were a couple tiny pinprick dots that were covered in scars that were showing the black veins of toxic ooze. "Whatever poison that's coated the arrows are strong enough to hold its own domain of faith I don't know if it's reasonable to add the battles of the gods within a person's body right now they can be risky without knowing which God is battling who as you know." Tyson responded with a bit of a clear understanding of why she hasn't been able to remove the curse curse herself.

“And since you worship a lesser deity, I couldn't grasp the name of the Goddess but I don't think it's actually the avatar herself so could you give me some details and see if you do have power or not?” “I already know that the dragon might not be a good battlefield choice after all ours was just a ruling deity it wasn't really that noticeable given God's ship from when the ruling gods after hosting a fantastic dinner and being very cordial. Meal was so good that the gods commanded immediately that the ruler would be ascended to heaven taken to the floating lands of above into the sky. And before the ruler could even set aside all the things that she needed done she was whisked away so she doesn't have that much power really beyond stalling for a little bit to try to get something set up so her kingdom wouldn't be left in shambles.” Tyson responded explaining the origins of their deity.

“Yeah very few party gods actually are that great at combat especially, if they're known for having a good meal.” Symu Slightly chuckled at that statement. “Yeah and they are worshipping a dragon that makes more sense now they might actually know this recipe and been secretly fueling their dragon with it the Dragon's been castings curse at the beckon call of the frogs to climb your territory is there any long-term negative side effects from using the fungal spores?” “This is just for my research but over usage without cool down time could cause one to turn undead, I've been very careful to spread out the timeframes when, I use the stuff on myself and never reusably reuse it on any of my students more than once. The process is slow and it requires you to invoke the name of your own gods, so. I'm not afraid of turning but if you're doing this to someone who is classifying themselves as a god it's entirely plausible especially if they're just continuously dosing someone and not giving a cooldown time of at least a full two weeks.” Tyson explained talking a little bit about the ritual but not giving too many vague information.

“I know she is a lion goddess of the unicorn fraction but maybe she can offer a little bit of help she was known to have some strength.” Showing off the bottle. “If my party could go up to your dam for a while I could use it plus it's with a bit of a ritual of my own to coat land for a little bit to at least buy you some time but we will need to slay the dragon, after all if the frogs have done what I think they have done the dragon is already dead it's just now undead grudge constantly unleashing a curse.” “I could spare a couple of my own students to help you out with this quest but if you feel like it's not necessary, I will gladly let you go to the waterways ourselves but it would be faster if you had a guide or two at least in my personal opinion?” Tyson responded with a good reply.

“Honestly we could use a vivid divide and conquer strategy since I doubt there's going to be that much resistance around your lake bed unless something comes up so how about Garyson takes us there, While also leaving the other group to the hunting ding spot that's been attacked regularly that could at least give us some more clues Zach could watch over Kathy while she's doing the ritual. Meanwhile Garyson, me, Maya, right?” Maya gave a slight nod. “And Miste will go check out the hunting area, I had double checked because it's either Maya or Zach. who are better at deductions.” “I'm sure these frogs are nothing more than just simple bandit raters and mindset so shouldn't be too hard to figure out what they're thinking to investigate what's going on.”

“Sure I already have collected it think enough mushrooms for at least another round if you need it but I could go for another run if you think that's best then we can use that as a disguise?” Garyson Turn to Tyson. “To make this more effective, I think, I should go ahead and do the ritual necessary, I have given that decent time frame. I could combine some abilities he's for some of our friends here I already need to enhance anyhow, Prisca. For her allusion spell.” She turned with a bit of a shock at that statement. “Well I need to enhance your ability to last long enough while doing something as stressful as 'child labor' To maintain the illusion and since your illusion requires you to witness your target if you're pretending to be someone else you're going to have to go with them to slay that dragon, which

means you need to be stronger anyhow, so you tag along on this journey since that we down anyhow a part of member it makes perfect sense.”

“Zach do you want to combine two of your spells, To make it stronger?” Symu Shouted out the window. “Yeah, I have a bit of idea for a crazy combo.” “Cool now can you also include a person's spell book to give them abilities?” Remarked the demon asking Tyson a clear question. “Of course I could have all three of you in the session and it wouldn't be a problem granted we would have to at least hold off a day actually, I think it might be a good idea to have you Gary to also be in the session just so that way I can maintain healing you during the process after all we don't want to 'turning' while taking our friends is over there.”

“Sure as long as I witnessed it sounds like a great idea, I will try not to be affected by this effect of course.” Respond Kathy being very suspicious after all this does give a suggestion effect she doesn't want witness anything bizarre happening to her teammates. “of course of course of course you could wear a mask to avoid inhaling the fumes, witness the situation.”

“Good Zach needs to be moved into the room so Prissy, why don't you help me out with the movement this way you can at least get some work out and we can see if this helps you get stronger.” Symu Said with a bit of a tone. With a bit of a nervous look she turned to her powerful priestess. “We can do the ceremony tomorrow let you rest to night and I will be busy working anyhow on Garyson.” Maya quickly entering in a minor question. “Gary Ranger?” She nodded gesturing to her bow and giving a slight tilt to look at her animals an eagle and a panther there but they were strange looking ones one looked like it was made of lightning and the other one looks like it was made out of stone. “Have your animals been infected too?” With a reluctant nod.

“How many times can they be treated before they get affected?” “Well Zephyr has a stronger immunity so she hasn't been affected that much and stone skin kind of makes it hard for arrows appear so I'm not sure how many times the poison seeped into Graga.”

The next day:

Symu & Prisca Rolling Zach torched the back of thee inn, Zack spent the whole night laying outside. “Tell me princess or should I just say rich girl what is your standing in the village exactly?” Prisca “Daughter of Alice and Murrow Peddle,Owner of the mines as well as the farming district of The town in technically Alice was the original village elder she got really sick then Murrow became the village elder then she got really sick,Now I'm technically the village elder if Tyson relinquishes her current duties as being in charge of the town's finances and everything currently I represent the town in all the legal documents. MOM, no longer with us.”Flashback of a bloody hatchet the full belly in a strange silver serpent statue. “Don't remember too much about that day but, Tyson did smile with a sad tone that day.”

“Okay second question what happens when you merge cards if they're in your own inventory do you gain a free spots or speak, thus allowing you to learn a new skill or two instead?” Zach inquired just as they rolled up to the back of the inn. tyson overheard the conversation and responded “Yes granted that's usually only because you've emptied out one of your slots it's based on your leveling.” “Good,Then I should be able to dip into a bit of my shadow knowledge a bit more.” Kathy was already sitting in a chair her face completely covered it in a mask as with only two tiny slits for her eyes and enough for her to easily hear.

Gary was also sitting in the room preparing these small container filled with incense a collection of

dried mushrooms were put inside the container along with a little bit of water. Tyson positioned the other three to make sure that the doorway was closed. Tyson grabbed a match, opened the lid and dropped it, then signaling Prisca to activate the flame. Smoke started billowing from the container, fumes of steam were floating into the air. Kathy instinctively made sure her breath was not going to inhale a single drop. Zach was used to smelling strong, illicit smells, the chemical corrosion seeping into her mind. Tyson placed her hand into the air next to Zach's head and pulled out two cards, one of the skill of her picking locks and opening doors and the other one, Summoning Mystical Knives, she threw across to the skies.

“So these are the two spells you wish to combine, any particular reason?” Tyson inquired and leaning in close and whispering. “When Gary turns, be sure to find a longer side, she cannot stay dead even if I can't bring her back from the brink of undead again, this is the third time I've had to do it, make it the 4th, fagana.” “Sometimes I wish to steal when I'm far away but it's hard to pluck things from someone's hands with my daggers normally. Also sometimes I need to open a door while running and it takes a lot more effort to kick it than it is to just pick it, you could say?” Zach pretended to dilate her eyes a bit further like she heard the tale but not responding to it, she actually heard the thing was going to pocket that information for later.

“OK then now I know which one to make more of the primary focus.” Tyson said, slamming the two cards together as they became one and then throwing them back into the head of Zach, returning to the mind palace. “Next Prisca, focus on your ultra image ability.” Tyson already pulling out the spell book of RunHild. “She's already agreed to give me one of her spells to enhance your abilities now focus.” Tyson only lucked out one card meanwhile the spell from the spell book generated a mystical card of its own. “Now normally I would not be able to continue this after doing two people but I can now do a third and maybe even a 4th or even a 5th while launching this state.” Combining the two spells together before slotting it back into her head.

“Now young lady do you have the book and question for your spell?” Symu pulled out the copy of her father's spell book, a tattered old book but Kendra's wrapped around its spine, skin crafted from sea creature with oily tendrils as she opened it up and revealed it to a level three page, the book was far deeper though it had more pages it wasn't a full route to full Kodak spells, most Wizards when they carry their spell books they only memorize one or two spells, the rest that they chart in their books, signed of their own accord, fireball and Mystic Tethers, then Tyson pulled out the card in question, tactics. “I can only give you one of these spells, sadly which one do you think is more valuable to you?” “I can already generate smaller fireballs than with the right skills, whose I can rely on, my team mates, I think the tethers would be far more useful after all Zach won't be around every place to bind and trap people.” She said with a cold, strict tone.

“Mystic tethers it is.” Combining the spell, the boneless body with the codex of wisdom, forging it into a card, while gently placing the card into her head, Tyson whispered something, “If Gary turns, bring her back to me as soon as possible, if your friend suspects something, don't kill you, you can bring Gary pieces if you have to.” Symu nodded with a great strength. “Okay now Gary, I've already combined enough of your spells to really make worthwhile, I'm just having you here so that way you do not turn it a moment to notice, so I'm going to whisper something into your head. Your priorities are the mushrooms, focus on that alone.” As the fumes slowly dissipated, Zach quickly pulled out thievery shadow magic 101. Quickly skimming the book, the mystical aura of shadows swirled around Zach and popping out from behind Zach, shadow was another copy, only completely darkened and also much smaller, with adjustments the shadows shifted and merged, picking up Zach's body.

“Okay I recommend you guys stay in town and don't do too much today practice your new skills have some place to practice though?” Tyson remarked kathy turned and suggest. “I don't want to practicing at your school no offense Tyson it's just I don't want any possibilities of one of your students asking a question and with these three underneath suggestion causing problems.”

“You can stay at my mansion I already invited your friends, Last night when we were drinking, I said come to my mansion in the morning you spend one night in the inn.” Given a slight nod Prisca, Exclaimed as the group's quickly walked to their location zach now being helped by the shadowy doppelganger lifting BOOBS its long arms turning into tendrils. When they reached the mansion door Zach stopped. “Is your door locked?” “No but I can look if you want me to. “Yes quickly walk it I must test I must pick.” She said with a man a grin. She walked behind the door you could hear the click of the lock and then that's really nice and if of mystical threaded energy instead crafting the knife from the spider silk with a quick turn of the thread the lock was unlocked and the door popped open. “Excellent now I need more practice off to the Tavern.” “Oh no you don't.” Maya coming quickly out from the door grabbing Zach by the ear and dragging her inside surprisingly well as the shadowy doppelganger was helping out with the lifting.

“Curse is my own mind has said I shouldn't steal to day darn it my persuasive skills of preventing me to fall into my kleptomania have boarded me again.” Zach said with resounding tale yes Zach is definitely hi As a bird in the wind. “I have a training court we can go to in the back this way, I don't have that many servants that stay with me any more.” Remarked the Village leader in training.

“Prisca, You're wealthy right? Your family's got to have a lot of treasure I'm not actually stealing it if you're going to give it to me! But, I can improve, my skills on your family safe?” Since she was already underneath the effects of suggestion there was no need to actually convince her. “You know I haven't bothered to check the treasure for him anyhow in a long time I have even and remembered the combination in a while so yeah this is perfect and we can take the treasure and use it to help the people?” “Yeah and if there's something you forgot in there that might be a monster or some crazy creature through that state in there and huddled in there, I can destroy it with my new moves so let's do it together.” Symu Filling the hype of being high on mushroom spores filling in her brain! “Hold it zach you're not going with that much you have 4 feet worth of TiTS, And she's going to be the new village elder she's going to give birth to possibly the elder of the lizard people she needs new armor so I'm going to kill two birds with one stone sound good?”

“You know if it wasn't for the fact that I threw off the whole suggestion thing and I gotta tell you stuff anyhow in secret without these 2 listening I would be arguing with you but I got information I need to tell so yeah take, her measurements we do in the backroom?” Zach remarked feeling still the high but also through years of experimentation with poisons and toxins probably knows how to resist the mind altering effects a little bit. “Okay uh then, Prisca, Test out your transformation spell before I take your measurements so that way, I know what form you're going to be in?” She turned to ask Miste. “Should I be a Kilsy or one of the lizard folk?” “Honestly considering you're already probably starting to rearrange organs as we speak Drakona, I can give you a rough design of them technically those are my ancestors.”

“Rearranging my organs, is that bad?” Kathy gave a big sigh as she went also into the room with Maya and Zach they can fill in Miste later! Once the door was locked on the other room Zach gave them the quick information. “I think Gary ate first wife, And I don't mean in the good way, I mean in the way where! If I suggested it, I might be actually in some stomach like right now.” Kathy “Tyson

might be strong enough to cast a resurrection spell but, I don't think she would be willing to risk it that much I mean it's known to fail and if you fail too many times you can't cast it anymore. That's why we do the reincarnation stuff.” “I don't think so knowing the research that goes into that resurrection spell I think there's other spells that might be able to reverse zamplification for a little bit but it takes a lot of mystical energy a lot.” Maya remarking taking a quick glimpse at Zach. “Oh yes that is true you can reverse it but that costs like 5 or 6 just to pull it off.

“And you want to wait until they're off suggestion to find out what's on their minds, Gotcha.” Maya responded while plunging her hands into nipples Of Zach pulling out some thread and then statching them to some needles. Then using her gelatinous forms of slide out from underneath the door with the thread Zach giving a bit of a moan. Prisca, hHCup size Still sporting the pregnant belly her new draconic head now sporting green scales with long scaly hair her horns were like dear antlers she had a tail that was very similar to her Dick, Right down to its pointy mystique head. Nipples Had bony structures on top as if they were tiny little horns as well. “How do I look?” Do you want me to cover both of them or just one or are you just going to hang them both out?” “Hang both on I guess because I don't want any obstructions she's when I go.”

“Ok then let's get started.” As she looped the threads back and forth back and forth showing off her assortmentship skills and her time with hatching up banded clothing she pointed those to her skills analyzing which areas need to be covered the best this is making strongest silk padding as she could go with! Making sure the stitch out certain key locations as stated she left the bottom completely exposed not that any one was going to actually attack down the stairs but she put more of the padding around the belly, stated her organs did look like they've been slightly rearranged already before the transformation. Has she opened and shut her mouth during some of it a little bit of saliva showing off some corrosive like droplets.

“Since our ancestors are more in tune with magic we didn't bother to maintain the ability to breathe out magical breath damage which unlike our draconic ancestors but I still recommend you don't abuse that effect we don't know what rules are behind your magic.” Miste remarked as Maya signed that they would talk in private wow the three knuckleheads are going to go down to that cellar. “I'll go look in the mirror upstairs now since you're done and then see if there's anything special I would like to do to it.” She said waiting for Zach to come out. The door came open with Cum,Rushing out in a very stiff Zach now down to a double P. “That was very very good. Also I think we just drenched the guest rooms.”

“ARARARRAWW!” Symu was quickly running up the stairs,Running in the direction where she heard the screen and oh Prisca Haven't seen herself in the new form. “I'm huge everybody was thinking I was 8 Lands in I think not 5,How big is a continent?” “Don't worry were you still look pretty. And we'll only charge you half a week's worth gold of watching you until you give birth. Giving off the same crying roars as she was giving off earlier smashing her scaly head with her horns rubbing deep into the breasts of the demonic lady. “Ooh that kind of tickles but let's save that till we get into your treasure vault.” “Wh wh Wkay.”

“My Fwvr!” Her reaction seen the floor covered in Cum, “Rwgs Tww!” Still filling emotional. “Don't worry she will have her owes back it's just because she's crying in there isn't it.” The draconic mouth had a hard time digesting big O's but small o's they could deal with but when you're crying everything goes big. “Don't worry about it just think of it as an extra scent of the mosque besides you're going to be covered a lot more with the 'holy version' {Gesturing to Kathy} so you're just going to have to get used to this.”

Zach continuing to walk with her massive Spider Glands having the fur rub against her swollen active and spewing Cock, With each bump of the knee causing a stroke of the long strong shaft that spewed the hot foaming SEED All over the red and blue fur the glands that are shaped like giant massive Breasts. “Stwp your sessile, Mow!” She said as she was noticing the large trail that was being left on her Goug-rugs! {You would think you'd get confusing that your months are also named after the islands that surround your continent but no it doesn't} [Have fun trying to figure out their year's cycle when I explain the moons in a little bit] “And you got your O's back although I think you lost your N's?” Remarked the demon girl after carefully going down the stairs they came across a large sturdy vault door.

“I wonder if my trick will still work even though this is a rotating dial door?” Zach responded pulling out her dagger you're of mystical energy now being crafted out of the immense flow from her 'steaming rod' ! Tapping the three dials that looks like snake heads but each head had a slightly different design. “The three dials are based off the three moons also known as the three Gorgon Sisters Medusa, Stheno, & Euryale? I can't remember what was though the clue about that it was something about birthdays and the phases of the moon but they changed every year?” She said in a calm tone and she got back her entire dialect then she didn't study dragon she doesn't slip into dragon naturally. “You may have to ask Miste for dragon lessons since for convention purposes later.” Symu Scratching her nose trying to think dragons are often guarding their treasure so naturally putting the biggest threat to Dragons in front of your treasure makes kind of weird bizarre sense?

“Let's see let's start off with the classic reference, Thankfully the three sisters will never stare at us at their full eyes together always one sister must be looking away from the other there are times where two sisters will be staring in the same direction but if all three happen to be in the line of sight you will be stoned and so everyone around you that you know?” Purpose see lining Up the dials in the position that makes it look like that they are at full moon for all three. 0 clicks. “OK now it's time for me to actually start puzzling this thing. {Okay there are 28 days in A land as stated, Also it is true the sisters who can never be all full at the same time, Medusa has 28 cycles the middle sister Stheno Has 25 cycles And the youngest Euryale has 22 cycles, Now technically they have only one sun but way how the moons work make it look like that there's actually two suns. The main star is called **Bahamut!**}

“28-25-22” During a couple of rotations medusa stopped a good clicks when she reached 8, Turns on each one of the faces the trickiest part was safes like this could only be set for A particular year for reference not particular day so it would be locked at a certain year for its combination cycle you can't play it off of days you actually have to remember the year and The Gorgon cycles? “That's the first Medusa Eclipse of when was this safe installed?” “1426, The year I was born?” Prisca Noticing the larger puddles slowly building. “Of that year maybe, I need to turn to the first eclipse of each one of the girls.” The next sister was at eleven but it took a couple of rotations before it reached that click of 11 which meant the land, Ram Known for its excellent goat farm. “ZigLand 18, As the youngest is consumed by the gods.” Click as the door opened.

“I just remembered I locked several of the infected servants in here?” As three skeletons slowly got up!

[Skeletons Servants: OOO/OO=Th4/8, Def10,Blighted ClawsMelee: 2D4Phy. Features:Their bones: Take only half damage from magic. Reanimated resistance: Requires a death blow in order to stay down] Zach flipping backwards immediately tossed her first Dagger and slamming her chest onto the floor that was extremely sticky because flipping three feet extra was not going to happen. Sizing of one of the arms of bone. Only the hands were covered in dark black goop.

“Don't worry I can take care of this with my tactics let's do a team attack Prisca!” Symu Said feeling her heroic energy as Her's Cock Began that turning to blue flames and split into a variety of cables!The cable's lashing onto the bones wrapping around the spinal cord the hip joints and the arms! “I only have my pum spell my hands!” Crafting a mystical spell within her palm and slamming attention to the chest of the creature! As the two skeletons quickly swarm towards them! Zach Is that quickly doing a quick pump,Of her chest to have blast off two small web balls on one target get of the skeletons blasting it to pieces while binding the rest it's slowly trying to reform. “It's dark magic makes it where it can resurrect itself if we don't destroy the bones?” Prisca remarked remembering quickly her studies! Just barely able to dodge diving away from when the skeletons grabbing a helmet and slamming it onto the skull of one skeleton that was already down performing a double tap.

“I'm glad I got all the physicals!”Zach said pulling out the two blades from behind her back large semitar swords now made out of sterling iron instead of poultry bronze! Symu “Technically bones count as physical as well how about the bones of your enemies.” Swinging her hips she slammed the skeleton that was still tattered to the bindings into the other skeleton then that was just about to make it swinging attack then Zach leaping into the battle we'll spun the blades smashing the two skeletons together the skeletons were gone broken them battered into dust. “Oh yeah that was awesome!”

The three immediately got started searching after making sure the skeletons were not going to get back up, There was a jewelry box that was instantly opened showing off several rings. “I'll Give to right now one to each of you and then, I'll give three at the end of the journey and I'll be testing out one of the three which one do you think should be useful?” She said showing off that there were five rings stored in the jewelry box the ring of swimming was going to be useless the ring of Shooting stars would be extremely useful right now,The Ring of evasion would be best to be used by the person we're protecting it gives you the ability to evade a lot faster. Symu Gravitated to the Ring of swimming. “It might seem useless at first but since it makes me move faster in water and we don't know how much 'water' is going to be involved, In battle maybe this will be useful later.” Debating on where she should put the ring.

“Well considering that you already have the ring that's very similar to shooting stars I will take the shooting star one. You should take the evasion ring it will be useful for our drachonic friend later and it will be useful for you now.” Zach said with a quick tone as she slipped the ring onto her finger. “You know what I agree.” Slipping on the ring of evasion onto her pointer finger because currently her hands are much thicker and scallier. Then the group walked over to a case collecting three items the robe of stars {A tier three armor} The boots of speed {A level one magic item} And laying next to it was the sword of power a mass produced version of a flames sword that's not as good as it actually should be of the flame of sort of fire light. It's also a tier one weapon in trying to imitate a tier 4 weapon. “Boots are mine.” Remarked the Demon girl kicking off her old sandals and slipping on the boots of speed.

Zach opened the case and placed the cloak on top of Prisca,With some quick stitching latching it

onto the robe in question secretly degrading the Item to a level two item version but somehow making it stronger on one end while weaker on the other. You can wield a item that is one tier higher than you but you also have to meet its requirements it's more effectively the Rope of stars can only work on those who happen to be of either the arcane domain or the shadow domain if you are both you can wear it when you're a tier lower if you are just of one you have to wait until you are the same tier. "I feel this is more forbidding for you it might not be as strong on cushioning blows but that's what your beautiful scales are for that you have taken on. Besides it's freed knives throwing And with the flick of my wrist I can make my own as well as my own hinchman to throw them for me." As she summoned the shadow demon of her own twin handing over the sword like a kneeling knight to the queen.

"And since you are going to be the Lord of this village you should show those lizards the power of your blade and with a little bit of skill we can make this one into the real one when you're strong enough?" She gladly accepted the sword. "I know you're almost full on inventory so you're probably just thinking, I need room for more loot later! but you're also buttering me up so, I am thankful for that even though I am still underneath the levels of persuasion! that you could probably make me for all I work, but, I'm so glad that you're still being nice." Zach gave a sliced smile. "Well even though we will be leaving tomorrow we do need a place to stay after all your only 5 lands in your trip around the 8 possibly 9 land tour, I think it's pretty obvious we're gonna be staying here for a while?"

"Oh yes and that means you should be calling us about a hope through lovely village holidays!" Leaping and jumping said the demon girl now debating should she just wear the ring of swimming on her hands or Make it into a piercing. "Speaking of up are those all the same type of ring on Tyson, 'Magic staff' or are they separate ones?" "I think they're all the same but I don't see why you can't make the match if you're going to try your friend has her styled his long chain are you going for ornamental tip or a chain that could be the question?"

"I have to think about how to do that late ... ,Something smells delicious?" Symu Remarks as the group smelled the delicious food coming from the kitchen back upstairs. The three stomachs were starting to get a little grumbly and growly. Zach leaving the trail of ooze he says they left the bolt room door closing it to make sure whatever was in the chambers was going to not come back out just in case, Kathy, Had laying on the table 6 Lamb Steak & Cheese Soup! "I figured I should make everybody a delicious meal, Here's some lamb Cheese soup." The golden buttery cheese dripping all over the salt tree delicious lamb cooked to its finest exterior soaked in some small salt and fiery extinguishers. "BeoLand 5, here's a good day for lamb." Prisca Remarkd slamming her spoon into the soup picking up a large chunk of lamb with it a slurp.

"Well you know since we're going to be staying with you and I don't like leaving our mansion completely unsheltered how about I work on making a leap portal from here so that way we can regularly check on you more accurately in case we need to go visit back our original place for more information?" Remarkd Miste trying to figure out if she could make a temporary teleportation spell? "We should put it in the vault, For security reasons and also so that way we can decrease how many people will be using said teleportation circle?" She replied after munching a couple pieces of her lamb giving use to the idea of having sharp jagged teeth. "Not to mention if we do have to put a portal in wherever cave that they happen to domicile well the 'Dragon' replacing. You can institute the treasure hoard to be more extreme." Remarkd Zach.

"Yes that sounds spot right?" Prisca Responded eh she also heard a loud crunch. "I'm going to go through a lot more fine Ram this way am I?" Spitting out some fine bone crafted pieces from her spoon.

1453-4-5: Portal stabilization

“So there is a way how to open the door if you're trapped inside here?” Miste asked inquiring about the doorway just after they finished eating. “Yes uh all you have to do is just pull the lever and turn the dials. While charging them that's why the undead could you open the door, you have to actively be charging them so what cost you will put the energy gee if you're trapped in here.” {3 hope to open the door if you're trapped inside} “And if you don't establish a portal that would also cost a lot Of Mystical Energy, I think this is a good idea. Do you have to turn the dial specifically or not?” “Oh and also you have to use the same combination number that's probably another reason why they had to open the door I forgot it.” “And the number?” “Medusa,1-8,Stheno,4-11, The last one is 7-18,”Zach quickly chimed in. Symu Brought down the large bathtub. “Now time for you to do your little magic.”

First off Misty Signaled Zach to walk over to the bucket using Zach's Seeman To fill the tub mixing in some of her Tits's Milk. Slightly stirring it before marking around the thing the start of the circle. Once it was all set and done and the glowing effect happened one of them had to nominate themselves for the quick test for a quick jump back and forth. “Look I'm kind of drained right now so I can't just POP over?” Zach gave a big shrug and decided to leap in. A few minutes later Zach leaped back out. “Good news, we did not lose the previous checkpoint. Although it's quite exhausting to swim to these locations.” Zach said resting in the giant tub. “Also it's a little tight at the church.”

“Well I'm pretty sure it wasn't meant for those.” Poking at the mountains of flesh. “I'm surprised you managed to move out of the Observatory actually?” Zach chuckled at that statement while admiring the extra ring that was right next to her signature family of Crest that was kept concealed because it was always facing Zach not outside. “Now Prisca, If you're going to raise a dragon lord you need to know more About the draconic religion so that way you can raise her properly!” {According to DaggerHeart Rules this is based off the character not the GM, The gm only is classified as an advisor. So this will only conflict a little bit with certain rules of storylines.]

Dragon league 101.

Miste took the mother upstairs,To a room it turned out to be the library perfect as she sat down behind the business desk. “Asyn is CerithniHar Daughter luckily this means she's in the green circuit which should help you out a little bit,Granddaughter of the earth kingdom, Verthdosk Niece of Ambar-Nimloth. Which means she is 14th in line of the Earth Kingdom of the dragon forest lines. So you have 4 options to name the child you can go CaenRhi. Which is 10 5. Shiar Iaehhs, Which is empire's wealth. Laeg = Green Fveik Which equals steel.” Before she could add the last one, young Lady replied “and your name? Fog And I'm not going to translate my last name. All you need to know that it references darkness.” “What's the name for rock?You know as in the stone not the bird.” “Mna,Which I think could be fitting if she owes debt to energy which you'll be abundant with.” “Fveik Mna, Peddle it is.”

“That sounds like a good name although we're going to have to find out soon what's the name of B right we'll dragon so that way we can have a name off?” She said with a smiling glee. {Bonus roll} “A name off what's so important about that please tell me, I don't have to work on trying to change the name to be better?” “No it's how many times you can use the name in a spell,That's why I don't tell you the name of my elast translation it's a lot of spells interquined in merge together into one really long name you have to interject every part of the original name into a spell go into your native tongue sense yours is common you can gravel off a lot of spells that involve Earth and steel.” “So this is a title off essentially a brag.”

“Well we are dragons we're supposed to brag about how beautiful our skills are how well trimmed our claws are how bushy are scaly details are. How many times a day we play with our food and watch it squirm and scribble and squeak and shrink and terror in ooh I wish I ate those rats now.” Slightly drooling over the idea of eating the silver twins if it wasn't for the fact that she had the sculpturing burn one.

“Your drooling are you still hungry?” She said walking around the bookcases, Listing the different Medals that are located within the book. “Maybe a tad.” She said trimming her claws to each other they're on one hand. “Well we can always hunt up dinner and make it worthwhile? For some odd reason the way how you talked about playing with our food sounds delicious?” “And maybe later on we'll be eating some nice delicious frog legs or maybe some lizard tail?” As the two looked longingly into each other's eyes. “You mean for tomorrow?” Given a slight nod.

As the two left the library, Walking over back down to the main floor the door closed listening to Kathy & Maya disgusting on the finer details of the 'prayer' the word correctly. The two slowly walked over to the back of the mansion, Miste remarking that it seemed like everyone has a bit of a farm in the back {Not exactly those words though} While seeing the swishing back and forth of the tail she was wondering how much was this an illusion and how much of this was unique body shaping magic after all the difference between the Codex spells and the midnight spell version of shape shifting was based more on how much they work together they're the full year senses the midnight one just altered your eyes perception from one person to another after all looking generic is no big difference meanwhile the codex version was built more for a variety of disguises to imitate someone else to fake being someone else that's why the bards use the codex version instead of the midnight version.

“Technically we have a lot of sheep here anyhow with that needs shearing. Since we were starting to get to the end of spring and starting to Dragonfire {summer}.” Wondering how Zach is going to deal with the fact that those giant furry balls are now going to be sweltering with sweat and semen for a long time. “Ohh speaking which I was wondering any special holidays usually holidays keep us cool during the days of Dragonfire?” Considering that they live in the mountainous areas it was more likely that it's going to be nicknamed Dragonfire every place has these middle season references a joke spring is often intertwined with bloom or variety of other references to the fact that plants start their life cycle during this timeframe one of the big reasons why Witherland is nickname Winterland is because it's the coldest season, Some people even jokingly state the actual island is nothing but covered in snow and ice as if you ever visited. “So are we going to bring out some special shears because I don't think you're flaming swords a good idea?” Miste making a bit of remark while coding her claws with nice sharp icicles. “Actually I was thinking about using my hands to see how well My dragon claws work?”

Miste easily slide off some of the fur of the wooly coats although the wooly coats was very different they didn't feel like cotton or the normal types of fur that she was used to it felt more metallic meanwhile Prisca, Cause the lamb to jump and leap away from her. “Do these sheep also have unique properties or are they just your standard sheep?” “Well If I don't let my sheep graze outwards their wool does sometimes turn into steel I'm not sure what causes it we keep the grass very minimal here so it can't be the grass maybe it's the grain but then why isn't my hair averagually steel instead of being perky red like half of the village. Oh and yes we do have a couple of holidays uh.”

She remarked getting up and dusting off hers new Scaly Bali and big breast bouncing jiggling against her big belly if it wasn't for the massive belly in between her giant pulsating orbs would be rubbing against her own junk which was starting to react from the activities. Miste couldn't help but stare slightly drooling still looking at the open horns ready to leak out milk.

“Cora Crown is a tradition, Basically from the first day of Cora, To the last day if you're pregnant you're supposed to keep it up but not released which means, I'll be probably participating this year dang it I'm going to be stuck having our erection for an entire 28 days.” She remarked already having a hard time seeing her own Cock, Thanks to our massive belly and pulsating breasts. “Wait how is this a holiday tradition what does every other girl that's not dreaming with children and have to make themselves look as sexual as possible well during that time frame.” Slightly wondering if she would have to dress more provoked or late then she already naturally does. “No although at the end of the month if they are unwed they do pick which one to bed the next day, if not you're usually listed to unload into your partner as much as possible.”

“Oh then what is the tradition for those who are not with child?” “You pampered prepped the one who is pregnant doing their things for them granted you're not required to do this unless you're as far along as I will probably be by then or earlier if you're like only a month in you're not told to do that.” Sheermark giving up and getting ready for another strike at one of the other sheep, This time both of them missed striking the sheep. “Okay how about this time I do this!” Prisca opened her mouth! Firing a bowl of acid this is from her mouth like she was vomiting of stream of toxic waste right on top of one of the sheep the ghoulish issue sequence occurred. “Note to self do not use my new acid breath on things that, I wish to kill and eat unless, I wish to turn into soup, I wonder if it's safe to eat my own acid vomit?” Miste quickly was checking to see if that was the normal type of acid or more like a spell little spell. “It is real dragon acid breath, Holy Unicorns that she literally change to the ancestry?”

Few minutes later.

The two brought in some more lamb for quick cooking after finally getting the handle of how to kill the sheep and yes they were producing steel wool instead of regular wool it wasn't for the ice coding Miste's hands would have been completely torn to shreds. Also the fire sword was not a detrimental it was actually a boon. “Mind if I have you help me cook a little bit?” Miste remarked to the young lordship. “Sure I'm not sure how much help I'm going to be in the kitchen but okay.” As she gave a bit of a moan as one of the horns on her chest were being tweaked a loud crack across the horn Nipple, As a small stream of slightly different colored milk instead the pale white the milk was more bluish. “Ah yeah forget that you probably haven't been brewing that much and you've probably not been eating that much of the fermented berries.” Looking around the kitchen for some berries as well to help with a thing and maybe some old vintage wine. {First off for most three things medieval culture water is death, I mean it's not unheard of for water to be cooked to boiling temperatures on a regular basis and if you're not drinking boiled water you are drinking alcohol fermented liquors are naturally bacteria free not good for your body otherwise but hey this is before we learned that intoxication was a regular thing}

“Sorry if I'm not grabbing the good stuff?” “Don't worry the good stuff is down in the cellar right next to the vault which I haven't checked in a while so we may have to kill some slimes down there.” She replied Ye to Miste with a bit of a remark. “You know if the prayer goes the way it does who knows maybe the entire village might be doing the crown this year.” She said with a bit of a snicker. “Oh boy that means everybody might actually be around a footer or two gang and that will be one heck of a population explosion this time around to bounce back from the sudden drop.” She replied just as the others were slowly slipping into the kitchen to help out with the cooking looking a little sad.

Game planned dinner.

“Pum Woods Is only a half a day's ride, At best so we should be OK. Mount Tai, Would only be about three days ride give or take.” She said explain to the group exactly how far they would be traveling the dam would be torched the beginning of Pumwoods. Technically the dam has its own nickname for the lake it created but it was just faster to state how long it would take to get to Pumwoods. “Tonic Lake, Might be a Suzz out,When I'm done with it.” Kathy remarked looking at her already very hole ridden, Penis being held together by her own collection of rings binding it together as a chain. “Yeah wait what do you mean by that exactly are you going to have to drink the whole lake to make up for how much you're going to be spending of water?” “Possibly and then some.” She replied to the young lord.

“That's why we're putting you on Protection detail until she's done instead of you going with us to mushroom collection. I know you were looking forward to really syncing your teeth into possibly some of the frogs but I think it would be best if you were given a smaller job and we know you're still going to have to fight something then considering that damn is naturally created by paddle dogs?” Zach exclaimed detailing the possible jobs that we're going around they slightly readjust it because know the subliminal messages Zach was originally going to be doing bodyguard retail except for Zach is immune to the mining control so it was a good idea to just figure out that the ones that could theoretically been given orders to attack the teammates not going to happen. “Don't worry I'll be there with you giving you all the prep work.” Symu Trying to give reinsurance. “Thanks for the confidence boost I guess and I'm going to probably need it. Also I guess it makes sense you don't want me to get into too much danger with me about to explode any minute.” She said poking her large pregnant belly.

“That's the exaggeration you have at least got four more lands to tour possibly you're going for the full 5 It looks like to me that you're only pregnant with one egg right?” Remarkd the demon looking at her dragonic friend who is giving a slight nod. “5 lands and I'm going to be crowning for an entire Land that is not good!” “Crowning??”? Miste quickly explained the holiday to the rest of the group. “Ah so I would be already disqualified today.” Remarkd Zach giving a slight tinge of a giggle while flicking her own swollen Dick Which sent a bit of a spray of fluids and semen into the face of Maya. “Stop it um that actually tastes pretty good.”

As they laughed and giggled and talked about the strategies and things that they would be doing getting ready to go to their separate rooms and planning out their stays. Miste locked the door behind Prisca. “I don't know if you can keep that transformation Active for four to five lands especially if one land you're going to be stiff as a board. But also I don't think you can raise the child by yourself even with the village helping you and who knows if they'll accept the kid or not as their leader and I am looking forward to trying to acclaim some draconic titles a small village is a good start so how about we make this a date after this little quest after all you've Fuck, Me. Pretty much since the start of this journey let's actually make it worthwhile?” “Are you just saying that because I look like one of your lizard ancestors!?!?” “We are not lizards! Cats, Feline in nature. No, But if you can get past your issues I can get past mine. After all I've spent wild and crazy nights with those two long kids before she became a plasma annoyed.” Gesturing to the door obviously noting that Maya and Zach were listening in also Symu.

End to be continued in the mushroom files?
