

The city was unprotected, their heroine not having been seen in days. People start to worry as crime runs rampant in the city...

Caitlyn opened her eyes, her head spinning as she tried to look around

"Wh...what happend?"

Last thing she remembered was when she was flying over the city, on her way to.. to.. she doesn't quite remember.

"Hnnng.."

She groans as she tries to stretch, but she can't move her arms or legs even a little bit. It's only now that she notices her situation. There is nothing in her surroundings, just a large, empty warehouse with her suspended in midair in the middle of the room. Her hands are bound to what seems like metal chains suspended from the ceiling, with her feet being stuck to metal chains from the floor. This gives her the awkward position of something that resembles a star.

She tries her best to break the chains, tugging and squiring around. It feels like her superstrength isn't doing anything... She is already starting to get a bit worried as she breathes heavily, her bosom heaving in her tightly fitting costume. Then, a door at the front of the warehouse opened with a loud bang as it hit against the back wall. She shook her head lightly to get her long brown hair out of her sight to get a good look at who was coming through the door.

"I knew it should have been Unchained..."

She tugs on the chains as she stares at him in anger.

"... with the chains and all"

Unchained smirks as he nonchalantly looks up at the tied up woman tied.

"Well, seems like "Resilient-Woman" isn't so resilient after I took her powers"

She shivers from anger, tugging hard on the chains

"Thats not my name and you know it!"

He shakes his head with the evil smirk still on his face as he walks closer. He eventually stops once he is underneath the woman. He might be 16 feet under him, but she still feels uneasy when she can't easily spot him.

"Fight me like a real man you coward!"

She tugs on the chains as the sound of them fills the warehouse.

"There is no need for a fight, you already lost after all"

He says as he tightens the chain holding her left leg.

"But don't worry, you will be of great help here in my factory"

She looks around some more, scanning the completely empty room. The only machinery she notices is some futuristic looking machines on the roof, but that can't be all if this is a factory?

"You want me to work in your factory? That's why you caught me here?"

He laughs at her remark as he walks back to the door.

"Oh no, you don't understand."

He smirks

"You will be the factory"

He pushes a button next to the door as he says this. This is when one of the machines lowers down to her chest, and injects a needle right through her outfit and into her. She sees the white-creme coloured liquid slowly disappear from the machine, assuming it's going inside of her.

"What are you talking about? I'm the factory? And what is this stuff?"

She squirms around as she tries to get the machine off of her, but the tighter chains have restricted her movement even further.

He doesn't respond as he leaves the room, closing the door behind him. She does notice little lights from cameras mounted to the roof turning on all around the facility.

After what felt like forever, the machine detaches from her chest and goes back to its place on the roof. She takes a look at where the machine attacked her, but doesn't spot anything of note, apart from her suit now having a small hole. This all changes when she suddenly feels a warm sensation spreading all around her breasts, making her squeal softly. She notices how it feels like her nipples are becoming more sensitive, as if they are now scraping against her suit.

"Hnnng.. what is going on?"

Wet spots start to appear on her suit in the place of her nipples, and this is when she notices her breasts actively becoming larger. Her fairly respectable C cups were growing towards D cups!

"He.. he is turning me into a milkmachine?!"

She tugs on the chains, not only out of frustration, but also because the swelling of her breasts is scraping her nipples more and more against her tightening suit, with the wet patches becoming larger as she already starts leaking milk.

"Why does this feel... good?!"

She breathes heavily as her breasts gain cupsize after cupsize, with her suit tightening more and more. This causes the suit to slowly start ripping around her chest, starting from its weak point where it was punctured earlier.

"Please... rip open.."

She says between heavy breathes.

The door slams open again, making her hold her breath as she slowly whispers to herself;

"never mind"

"I was just gonna watch the show from my office, but decided I can't miss this live"

He says as his hands start glowing, signaling the activation of his flight powers.

"Get away you creep!"

She says in between the sounds of ripping as her breasts start reaching the size of pumpkins.

"I have to give it to your tailor, that suit held on for longer than I anticipated".

He says as he flies up to her face, his arms crossed as he grins menacingly.

"Why are you even doing this? What do you want?"

She says, panting. Her left breast almost completely exposed at this point, with milk dripping from her nipple. She groans as her right breasts also bursts out of her suit.

"Oh you're asking so many questions"

He says as he grabs her left breast, squeezing it. The stream of milk increases as he does.

"I caught you fair and square, and now I want to use your milk to increase fertility in humans. Your powers mix with that sweet sweet milk of yours"

He lets go of her breast as he quickly slaps her ass, making her let out a small yelp.

"Now go and be a good cow for me, will you"

She looks at him, anger in her eyes as she tugs hard on the chains. Milk loudly sloshing in her breasts as she does.

"I am not your cow, I will kick your ass!"

Her breasts are the size of a truckwheel now as they continue to swell. The dripping has changed to spraying as they weigh her down, making her tilt forward as far as the chains allow.

"Don't act like you aren't completely under my control"

He squeezes her nipples, causing her to moan loudly due to the new sensitiveness from them.

"S..stop that I w..warn you"

She says between moans. Her head now down as she breathes heavily, staring at her swelling breasts. They are almost the size of tractor wheels by this point, and every small movement she makes causes the milk inside to slosh loudly. She doesn't know why, but it turns her on a bit.

"Let.. let me go.. please.."

He just stares at her with that same grin, watching her breasts swell as if he's waiting for something to happen.

She feels the milk getting warmer, at least, that's what it feels like! She slowly realises that her breasts are not only growing, but also changing color! Starting with her nipples, a creamy white color starts taking over her breasts until they are completely changed to this color.

"What.. what is happening to me?"

She says as her breasts, now the size of a car, start to feel tighter and tighter.

Suddenly, the warmth was starting to appear in her butt and thighs as well. They too started to fill up with milk as they grew along with her breasts.

"Seems like your milk production is becoming too fast for your body, and is getting stored wherever it has space, who could have seen this coming"

He laughs to himself as he slaps her now swelling ass, milk loudly sloshing as her ass and breasts both jiggle.

"S..stop... n..n..no"

She is starting to lose her mind as the sensitive feeling of the swelling is taking over. Even her pussy is starting to puff up as milk is getting stored there.

"Mhmm... s..st..stop.."

Her words are becoming less and less understandable as moans slip in between every letter.

The chains start creaking as her belly starts joining into the swelling, her entire body now warm and filling with milk as her production ramps up more and more.

"Hnng...s...so..full..."

She feels a combination of embarrassment, lust and fear as her body grows. More sounds of stretching and ripping fabric can be heard as she swells. Her butt now the size of two watermelons, with the size being shared by her thighs and upper legs. Her belly meanwhile already looks like she is about to give birth.

"Ladies and gentlemen..."

Unchained is looking at one of the cameras while Caitlyn her suit is ripping apart further and further. She tries to look over to what he is doing, but the sheer weight of her milky body plus the swelling feeling make it hard to focus.

"I present you, your hero!"

All camera's pan to her, just as the final piece of her suit falls to the ground. Everyone is seeing her swollen, naked and dripping with milk!

"H...hel...hmmp..help me..."

She muffles, moans still being the most frequent sound she makes. Her breasts are now the size of trucks, with her thighs, butt and belly being the size of yoga balls. Even her pussy now starts to slowly swell as milk starts leaking from there too.

"Why don't you tell the people about your career switch to the dairy industry?"

Unchained grins as he holds a microphone to her mouth. Most of the sounds that can be heard are loud sloshes and moans as she tries to get her bearing.

"I...I...hnggg..I feel like...hmmm..a..cow.."

The chains creak even more as the two holding up her arms snap, making her plummet to the ground. Milk gushing from her nipples and pussy as she lands. The sheer weight of her massive, creamy white breasts immediately makes her fall on top of them as the swelling continues.

Her breasts growth is slowing down more and more as the rest of her body takes over, her body desperately trying to store all this milk.

"Why don't you moo for the audience?"

He seems to be really, really enjoying this, but maybe she is too? She has no idea what she wants any more as she gives in and loudly screams.

"MOOOOOO~~"

This is when the creamy white color slowly spreads over her entire body as she rounds out. Her arms and legs slowly disappearing in her rounding form. Even her cheeks are now swelling up as her mouth fills with her own milk.

"Mooowmmmm"

She cant even talk as milk gushes from her mouth, her cheeks getting larger as more and more is forced up her throat. She now looks like a big round cream balloon with two massive breasts the size of small airplanes in the front and a massive butt the size of a small truck in the back. Her pussy is also on full display, swollen and twitching. Milk is spraying from it as it twitches.

"Dont worry..."

He says as he squeezes are milk filled body

"You're almost at your limit"

He winks at her as she feels more and more immobile. Her head is now starting to sink into her body too as her hair and even her eyes start to turn creamy white. Her sweat and even her tears turn to milk as she lets out a final

"Hemmp...mmmmme..."

Milk shooting from her mouth as she says it before her mouth has disappeared into her belly. Only her eyes and the top of her head are now sticking out. Not that she can see past her massive tits anyway.

Unchained starts pressing buttons as he exclaims

"And now, the moment you have all been waiting for!"

Caitlyn feels her body starting to shake as her creamy skin starts getting tighter and tighter.

"The milking!"

Caitlyn can just about see the machine starting to lower down before her head is fully submerged in her milk filled body. She is shaking more and more and feels like she could pop in any second.

"Nmmmo... nmmmm..hepff.."

Unchained then hooks up the machine to her massive swollen nipple and even her pussy and starts the milking process. This is her new life now, and she can't do anything but get used to it.
