

I just woke up from another night of game testing when I noticed a slight tightness in my boxer briefs. Did I go through another growth spurt? Usually, I'm 6" soft with egg-sized balls, but now I'm pushing 8" with balls the size of a cue ball. I'm not complaining, but I thought for sure that being 30 meant I was done growing. Oh well, I start getting ready for the usual day of nothing much. I stay home unless I need food, but with online grocery shopping or DoorDash, who wants to leave home? Nowadays, the only time I leave my apartment is when I take the trash out or help my neighbor beat a level in a game, talk, and watch anime. She works for the same beta game test company as I do. I only found out when I got an email asking me to help a coworker.

I obtained her contact information from work to call and see what she needed help with the game. To my surprise, when I called, and a female voice answered, I fell quiet. I was never really good at talking to girls, except for my family. She answered and kept saying hello repeatedly until I heard the 'I'm hanging up now' spam call before I yelled, 'Wait, it's Stephen from work.' They told me to call you to see if I can help with your problem in the game. Okay, my name is Kaitlin, but you can call me Katie. Then, she tried her best to explain the problem, but I had better success when seeing the issues in person. Then she said, 'You can come over to look at the problem,' and I was like, 'Okay.' She started to give me her address, but I interrupted her and said, 'Wait, you live in the same building, let alone the same floor as me.' She lived in two apartments down the hall. I said this is perfect. I hate leaving the house, but I can come over. Fantastic, I'll see you when you get here, and then she hangs up. I get dressed more than just in my boxer briefs and tank top. I put on some pants with my favorite anime show shirt and headed down to her place.

I got to her place, but then I just stood there. I was never good at talking to women, so I rarely socialized with females during school or college. So I was stuck there till I heard her unlocking the door and about to open it. I was in a panic, getting ready to run back to my apartment, till I saw her. She was short, standing at about 5 feet tall, with light tan skin and long, black, silky hair. Her eyes were bright brown, with a cute button nose and some natural rosy lips. As I looked closer, she answered the door in a low-cut shirt, leaving nothing to the imagination. I could see her DD breast about to pop out. The only thing covered was her nipples, and I went further down; she was also only wearing her panties. Saw her thick but not chubby legs and could also see her ass cheek peering from the side of her panties. Then I hear her kind of cough to get my attention. Are you Stephen? I said yes, and as I was about to tell her how, she answered the door when she grabbed my arm and pulled me into her apartment straight to her couch.

She pushes me to the couch and then sits next to me, so close to the point the side of her ass cheek squished against my thigh. She leans over to the table to get the controller, and I can see her ass balloon out the top of her panties. My face turns bright red, and I try my best not to think of anything perverted and get a boner. She then leans back onto the couch with the controller, causing her breasts to bounce everywhere till she puts her arms under them while holding the controller and starts playing the game. She was about to finish beating the boss; the game froze and went to the main menu. Soon as it did that, she leaned over with her boob rubbing on my arm, pointing to the screen, asking if I was having the same issue when I bet the boss. It went in one ear and out the other cause I was too busy trying not to get a boner from looking at her boob touching my arm and spilling out of her shirt. She snaps her fingers in front of my face to get my attention again. I looked at her with my face turning red; she asked if I was okay. I started to stutter, saying, your boob is almost falling out of your shirt, hitting my arm. She looks down and says, 'Okay, and what, have you never seen a boob or something?' I said no since I've been a loner and never been able to talk to girls, let alone be around them.

She asked me if she should move over, and I said, 'Please,' while in the back of my mind, I was thinking, 'Why did I ask her to move if she didn't care?' Dumbass. As she moved over, I could have sworn I saw her nipple pop out, and as I saw it pop out, I knew I was getting a boner, trying my best to push and keep it down. Once she got over a bit, she asked again what I thought was wrong with the game. I asked her when was the last time she cleaned out her computer to make sure it didn't overheat. She told me I could look at it, and as I got up, I knew my penis was at full erection, standing straight out. I looked over to her, and there was no way she didn't see it. As I walked past her, she whispered, 'Did you see something you like to cause that?' I stopped dead in my tracks, not knowing what to say. After about 5 minutes of standing there, I finally mustered up the courage and said it wouldn't be up if I didn't, with a slight smirk. She said, oh really; as she started to pull down her shirt, I began to panic, and my face was turning dark red with embarrassment, but soon as she popped both of her tits out, I passed out. As I started to come through, I noticed my head was lying on something warm. I began to open my eyes, and all I could see were two giant light tan orbs hovering over my face. Then suddenly, they were being pushed into my face when I noticed her trying to look down to see if I was awake. She asked if I was okay, and with a soft 'yes,' she said, 'good,' and apologized for taking it too far. I didn't think you would pass out from seeing my boobs. I said no problem; I wasn't expecting you to do that at all and just got overwhelmed. Yeah, I'm Sorry. I was just curious if I gave you a boner since most guys didn't find me attractive in high school or college till after I

graduated, but by that point, I was living on my own and stayed home most of the time till I got this job and had to go in for an interview.

When I arrived, I didn't have to say much at that time; I was just a D-cup size then, wearing a low-cut top. I caught the boss mostly staring at my chest, and the next thing I knew, I had the job. But ever since then, I have gone out to get food and noticed other men staring at my chest or some at my ass which was a lot smaller than it is now. After being home so much sitting on my ass and testing games, I somehow only gain weight in my chest and ass. Honestly, you were the first to see me since I grew so much, and I couldn't help but catch you staring, which was turning me on. After seeing you get up and have that boner, I wanted to know if you would do anything, but I would have never guessed you would pass out. I tried to say I was sorry again, but all I could do was mumble cause her boobs still pushed against my face covering my mouth. I was starting to have a hard time breathing, and she wasn't moving, so I began to move my hand to one of her boobs to push it out of the way while she was talking about work. When I grabbed her boob, I couldn't believe how soft and big it was. I started to push and squeeze it when I noticed something pushing up against my hand. It was her nipple getting hard and was about the size of the tip of my index finger. I kept playing with it, and when I went to pinch her nipple, she stopped talking and let out a soft moan. I stopped, and she asked why I stopped. I said I thought I was hurting you. Oh no, you were turning me on didn't think you got the balls to grab my tit. I started to put my hand back down when she grabbed it and put it back on, so I went with it and began to play with it more. Then I noticed something was sliding down my stomach to my boner. I began to twitch until she said, 'Don't worry, relax, keep playing with your toy, and I'll play with mine.' I started to squeeze and play with her tit pitching her nipple over and over again. Then I noticed as I pinched her nipples more, she began to rub my penis faster and faster. I started to get close, and I think she noticed cause the next thing I knew, she pulled away from my hand, leaned down to my penis, and pulled it out of my pants. Suddenly, I felt something warm on the head of my penis, and I just lost it and blew my whole load. I heard her cough and asked if she was okay. Yeah, I wasn't expecting you to blow a load that big in my mouth. I told her that I had never had a blow job before. Yea, I figured since you blew your load soon as I put my lips on your dick.

Yea, I have never been with any girl before you, and the first to be in the same room with me, let alone; allow me to play with their titties. Well, you are the first guy I've been with, too. I was too busy working on my school papers and never had time to hang out or date anyone. But I liked you playing with my titties. I came a few times with you just playing with my nipples. Well, I liked it when you were playing with my penis. From then on, whenever she

needed help with anything — whether it was playing games or opening a jar — I would rush over. We started dating about a month after that day, and we've been together for about two years now.

I started making eggs when my phone rang. Katie's text asked if I could hurry over; she had something to show me. I could only imagine what she wanted to show me last time she bought a bikini that barely covered her ass, let alone cover her nipples. I hurried and ran down to her place, not realizing I was still in my boxer briefs, and knocked on her door. She opened it and grabbed my arm, pulling me in quickly. As she pulled me in, I asked, what's the thing you want to show me? As I said that, I looked at her, and there was something different about her. Oh, you noticed. My tits and ass have gotten bigger. My pants don't fit anymore even though I never really leave anywhere, and my tits have to be like f cup size now. As she told me everything, I started to get a boner, and she took notice when the head was pushing out from the bottom of my boxer briefs. Oh, I see you grew some, too, huh? I didn't respond till she snapped her fingers, saying you grew too. I mumbled at first before looking away from her tits. Yeah, I think I'm like 8" or more now that I look down and see it popping out from the bottom of the boxer briefs. Damn, I think I grew more since this morning because I wasn't popping out when I first woke, but it was bigger when I did wake up. Same here; my tits were only slightly bigger around seven this morning. They grew more in just two hours.

Not that I'm complaining. I did always want to be bigger, but not this fast. Same here. I always wanted a foot-long cock but never thought it could happen after I hit 25, still being at 6 inches. I suppose we're both late bloomers. Yeah, I guess so, but man, these things have gotten heavier, and I'm starving. I was about to eat when you texted me to come over. Oh, really, what were you making? I started eggs and was about to make some sausage. Oh, that sounds good. Well, if you like to come over to my place to eat, I'll make plenty. Sure, and we both ran to my home. I looked back and noticed she was leaving without a shirt or bra on, just in her panties. She caught me looking as she locked her door, asking me why you were staring at me. Well, you do know you just walked out without a shirt or pants on. Oh, well, let's hurry to your place. We sped walk to my place when she pushed through the door and jumped onto my couch. I made about 12 eggs and eight sausages when she came up to ask what am I going to eat. What you that hungry. Yeah, I could eat a whole cow right now, even though I look like one now.

Oh, stop that; you look terrific. My foot-long salute should say plenty as Katie walks up behind me, pushing her massive boobs into my back while slipping her hand down my boxer

briefs, trying to play with my cock. You're better off just kneeling and playing with the vast part sticking out of the bottom. As soon as I said that, she kneels, twists the half up, and sticks it in her mouth. I almost dropped the pan because I hadn't expected her to do that. She kept sucking it, but I could swear I was feeling my balls starting to swell bigger. After about 5 minutes or so, I came and heard her choke, coughing a lot. She lets go, and it slams back into my leg with a loud slap. I asked if she was okay when I looked down and saw her face was covered with my cum. I asked her if I had just done that. As she wiped her face, says yea who else was I sucking off. I wasn't expecting you to blow a load like that. You filled my mouth in a second and seeped out, spraying my face with just that one load. Well, I did forget to tell you my balls did grow bigger too, and they swelled bigger as you sucked on it. Well damn, we have to do that again to see how much I can make you come next time. I finished the eggs and sausage and set the plates on the table to eat. She sat on the other side of me and sat her boobs on the table cause of how big they are now. I was about to take a bit when I could have sworn I saw her boobs grow right before my eyes.

She catches me staring at her while she is trying to eat. What do I have food on my face? No, your boobs are growing; can't you feel it. Um, no, but wow, they are getting bigger, and she looks over at her ass cause it started growing too. My ass is getting bigger too. Oh really, with a raised eyebrow. She gets up and turns to the side, and I can see her ass is slowly blowing up but not as much as her tits. I could feel my cock getting hard as I watched, and my balls started to swell again. She asks if I want to come to feel them growing. I couldn't get out of my seat fast enough before I grabbed her, making her tits squish against my chest to grab her ass. I held a handful and could feel the force of the growth pushing my fingers further apart. Then I notice her hands going down my boxer briefs, pulling my cock out. We were both in awe when it stretched out to be a little over a foot long, with tennis-sized balls hanging below, slowly inflating. Holy cow, I can barely wrap my hands around your cock. I hope it will still fit in my pussy. Well, there's only one way to find out as she pulls my arm to the couch, throwing me down. She then sits on my chest while leaning down, trying to take my cock into her mouth as much as she can. I can start to feel her tits rubbing against my skin as she starts to go deeper and deeper. While she was giving me a blowjob, I played with her clit before I started licking it and slowly pushing my tongue into her pussy. I began to feel my tongue going further and further into her pussy as she began to moan loudly. She stops sucking my cock to ask what I'm using, and I stick my tongue out and notice it's like 7 inches long out of my mouth. Holy cow, what is going on? First, it was my dick, then your tits, ass, and, now, my tongue? She says, what are you complaining about down there? I said nothing. Then get back in there as she starts sucking my cock again.

As I'm playing with my tongue in her pussy, I can still feel her ass growing again and start grabbing, squeezing, and slapping it a few times. She moans right on the tip of my cock as I feel her pussy embrace my tongue. We both were getting so close that I shoved my tongue further in, causing her to squirt, soaking my face and the couch as I shot a load down her throat. I noticed she could swallow it all this time as I shot another load before she could take her mouth off. Once finished, she sat up, rubbing her stomach. I asked if everything was okay. Yeah, you just shot a lot, and I swallow a good half-gallon, and now my stomach is sticking out a little.

I asked if I did that much as she got off my chest to sit at the end of the couch. As I sat up, I could see the little budge she was talking about from all the cum she swallowed. I came that much. She said, no, I just drank a lot of water; yes, this is all your cum. You came so much you could fill a half-gallon jug. As she sits there, my cock goes full hard again. Oh, I see someone not finished. No, I was thinking of your tits and ass growing, and your belly growing from being pregnant just turned me on more. Well, if you want that to happen, you shouldn't have a problem with a cock that big and this amount of cum. If I don't get pregnant on the first try, I'll be surprised. Now get over here and try. Once I heard her say that, my body took over on its own and forced her down, spread her legs slowly, pushing the head of my cock into her pussy. Wow, it's so tight. As she says, no shit with a dick that size; it better be tight at first. I get my head in as she moans loudly, and her pussy squeezes harder on my cock. I noticed her pussy juices dripping down my cock yea, she just came, and I haven't started yet. As I sat there waiting till her pussy loosened up a bit, I could feel my cock getting bigger, but mainly it was getting longer. She yells slower, and I say, it's not me. My cock is growing in your pussy. I haven't moved an inch. Oh God, it's too big, but on cue, her stomach bulge shrunk and her pussy got looser like it was growing bigger. I could feel my cock going in her much easier than a second ago. She asked if I pulled out or something. No, your pussy just got bigger. What, well, it's a good thing, now shove that beast in there. Before I could get my footing, she wrapped her legs around my waist and forced herself onto my cock.

When she forced herself onto my cock I saw her stomach bulged out a bit. I put my hand on top of it, and it was my cock pushing up her stomach. She asked what, and I told her, my cock is so long your stomach is poking out. She put her hand on top and was like Holy shit, then squeezed her leg tighter, causing it to poke higher as she moaned loudly. I was only 3/4 of the way in when I noticed it was still getting bigger. Jesus, my cock is still growing. I looked up to tell her it was getting bigger when I saw her boobs were getting bigger too. I reached up and started

to play, squeeze, and pinch her nipples, causing her to squirm on my cock. I begin to rock back and forth as I pull on her nipples. I feel her pussy starting to squeeze on my cock. She is about to cum again, so I begin to twist and pull her nipples with one good thrust causing her to yell, oh God, and soak the couch, almost pushing my cock out just from the force of her pussy squirting. I start to back up to pull out when I see I'm about a foot and a half out and still in her pussy. Holy cow, I'm fucking huge, still pulling back. When I finally get it out, my cock is almost 2 feet long, and damn, my balls are grapefruit-size now. I look up and see her tits are the size of basketballs. Now, as I look lower, I see the gaping hole I left in her pussy. I could fit my fist with ease as I put my fist next to the head of my cock, and yea, it's bigger. I asked her if she was ready for round 3 cause I didn't cum this time. She tried to catch her breath and said, give me a few minutes. I just came so big my whole body is twitching.

I sat there as my dick started to get harder and started to stick straight up. Sitting up, and the head of my cock is at eye level. Ten minutes pass before she says, 'Okay, I think I'm ready for round 3 now.' She gets on her knees for doggy style. I notice her ass is huge now. Like 2 Beach balls, so much meat could put Kardashians to shame. I put my cock head at the tip of her pussy and start to push in slowly. She yells back, shove it in; it's already stretched out for you. So I grab each side of her plump hips and slam in. She bout ripped my couch apart as I pulled out a little before slamming back in. I start to go faster and faster. After about 10 minutes, I felt her pussy begin to squeeze my cock again, but I was getting close too. I feel my balls start to pull closer to my pelvis before I thrust one last time and explode an enormous load. I can feel my abs help push my cum into her pussy with such force. After about 5 or 6 pumps of cum it finally goes soft. I pull out and sit on the edge. She turned around, and you could see a massive bulge in her stomach, making her look three months pregnant.

Holy crap, could you fill me up anymore. If I don't get pregnant, it would be a miracle. We sat there for a bit as I turned on the TV. The news came on with a report about a virus going around, causing people to grow enormous breasts, asses, and penises. Also reported some people having a quick pregnancy. I think that's happening to us. Some had an ass so big got stuck on the couch. A guy's penis was sticking over balls the size of basketballs. Women are pregnant within hours of intercourse, looking nine months pregnant. She looked at me and asked if that would happen to her. She looked shocked, and when I looked back at the TV, they had pics of women with boobs so huge they were standing up, and the bottom of the breast was touching the ground. I was like, well, I cam at least a gallon worth of cum in your pussy, so that would be a shocker if you don't.

As we were sitting there, I could feel my cock slowly growing further off the couch. I was about to say ready for round four before seeing Katie's stomach shrinking and her tits ballooning out even further. I caught her sitting there trying to play with her nipples. They are getting so big, and I'm so horny that I can barely reach them right now. Can you come to play with them, please? Well, I wasn't going to turn down an invitation. I jumped up, almost stepping on my penis in the process. When I got over there, I noticed her stomach was getting a little bigger, but I turned my attention to her tits. My cock started to get hard again. I could feel it sliding up her stomach and in between her tits. The head begins to slide up between her tits and towards her face. As I play with her nipple, which is now 4 inches long and 2 inches wide like mini dicks I feel something warm on the head of my cock. I pull her tits apart and see her trying to suck on my cock. I push her tits together and start to thrust in and out, helping her out with the blowjob. As I'm thrusting, I feel something rubbing against my balls.

As I keep pushing and pulling my cock between her tits and into her mouth, I feel something rub more and more on my balls. I look down, and it kinda looks like her belly is growing now. Wait, if that's growing now, she must be pregnant. How do I tell her she might be pregnant and already showing after just that one time of sex? Her stomach keeps getting bigger by the minute. She looks about two months pregnant when I notice my hands pushing back. I looked up and saw her breast ballooning again. I jester her to slide down to the middle of the couch. She scoots over while keeping the head of my cock in her mouth. As I went back to playing with her nipples, now bigger than a second ago and turning brownish, I noticed tiny white beads coming out.

I start to pull a little harder on them when they stream out milk, almost hitting the ceiling. Some hit Katie's face, knocked her out of the blowjob trance, and looked at me, asking what was that. I told her I believed that was milk. She asks how can that be milk before it clicks. Oh crap, am I pregnant? I tell her I think so since your breast just inflated with a tremendous amount of milk and your stomach is growing bigger. She reaches down over her tits which are starting to sit on the couch on either side. Holy crap, I can feel my stomach still growing. I knew there would be no way I wouldn't get pregnant after that load. Then she looks at me and says I'm starving while looking back down to my cock, now almost three and a half feet long. So I wipe it back up to her mouth, resting on her growing stomach. I reach over, grab one of her nipples and start to suck and drink her milk. I swore I could feel every swallow of milk I took go straight to my balls until I felt them hang low enough to hit my knee and couch at the same

time. My balls were as big as two medium beach balls now. I look back at her when I notice her stomach is enormous now. She looks seven months pregnant now with breasts the size of small bean bag chairs on each side of her. I got more aroused from what I was looking at when she took the whole head back in as I blew my load. She swallowed a reasonable amount. I kept pumping load after load before she started coughing, popping my cock out of her mouth, causing her face and tits to get covered with my jizz. She sat there licking my jazz off her face and tits when I went to grab a towel to help her clean up before I tripped over my cock. I got back up and looked down to see it was resting on the floor. Just how big is this thing going to get? I pick it up and flip it over my shoulder to make walking easier.

I return to find that she has licked the majority of them clean. I saw some on her stomach that she couldn't reach with her tongue. I went to clean it up when I noticed she had grown more. She looked well past nine months pregnant now, with her stomach hanging off the couch, a good foot and a half. She looked like three fleshy balls, with her breast and belly being so enormous with little twig legs and arms sticking out the sides. I rub her big baby belly when I feel a big kick. She yells, hey, did you feel that kick? Of course, I did, but how big are you going to get? I'm not sure, but I'm still hungry. I bet with whatever is growing inside you. I walk to the kitchen when she stops me with her leg and then points to my cock. I look at her and ask, 'Do you want this over food?' She then tells me not for my mouth but the other aching hole. I look at her and ask how I am to reach it. She then slides off the couch and leans back as best she can before she yells, and I hear a loud pop. I looked around, making sure she didn't just explode, before I noticed my feet were getting wet. I looked down when she said my water had just broken. I yell, no shit, what do I do. She cries out loud, 'It's coming.' Help pull it out. I reach down when I see the head pop out. With another push, the baby was here. It was a boy. I get up to hand him over to her when she yells, not done, yet another one is coming. I hurry up and put the baby in a towel on the couch before I reach back down to help with the other. Again, within two pushes, the baby was here, this time a girl. Her stomach deflated back to almost average size as I handed one baby to her to hold to one of her nipples. I held the other baby up to her other nipple.

As I held the baby, I felt something rubbing on my cock. When I look down, she tries to stroke my cock while feeding the baby, giving me that look of wanting to be plowed again. So I help her and her enormous tits back onto the couch. I brace the babies around her nipples so they can eat while she plays with my cock. I started playing with her pussy when I noticed it was almost back to her original size. I couldn't believe it just a few minutes ago that a bowling ball could fit in with ease. I started to step back and slide my cock down her face to her stomach

before the tip was right in front of her pussy lips. She looks down and says it might be a tight fit as I slowly push in. She starts grabbing the couch and moaning as I slowly stretch her back out by just moving my head in. As I get the head in, I notice her trying to reach over when I see the baby wasn't a newborn anymore. They were growing right before our eyes. They looked to be about 1 to 2 years old now. She was about to ask me what was going on when I slid in more, causing her to lose a train of thought and almost squeal in pleasure.

I had a foot of my penis in when I noticed a bulge in her stomach. As I slowly push more in, I see the lump rise more towards her chest. As I get about two feet in, realizing I can't go any further, I look over to the babies that are still growing. They were both now closer to the age of five. With a closer look, they looked like mini versions of us, but as babies. I start to pull back when she wraps her legs around me, asking what I'm doing. I tell her I can't go any further without causing damage to her insides. She yells, you better get all that in me now, and as she tells me that, I could swear her pussy grew bigger to allow me to go further. I slowly push more in right before she squeezes her legs, forcing it all into her pussy. There are only 5 inches left to push in before I look over at the babies again. I notice they start to go through puberty; the mini-me cock grows as the mini-her tits and ass begin to grow. I shove the last bit in before I pull out a good foot and half to slam back into her, causing her to moan loudly. I then notice her reaching over to both the mini us with one hand rubbing his cock and the other playing with her pussy as they still suck on her nipples. His dick starts to get hard and looks about 10 inches long, growing still, while the mini her tits are about E cup size and plump ass. They are approximately 14 years old now and continue to grow. I keep pumping her harder and faster as she plays with them. I start to get close when I feel my abs tighten up, and I blow an enormous load. I see the force of my load push her stomach out before inflating her with each burst of my load. With every push, I blow another massive load. After about the 11th push, her stomach reaches the size of a beach ball. She looks at me and says, 'I hope we have another set again.' Just then, I notice something immense and squishy on my back, pulling me and my cock back out of Katie. When I turned my head around, I saw it was the mini-her, now almost full-grown Katie clone. I look over to see my clone play with her titties trying to get a blow job. I noticed his dick was about a foot and a half long now and about 21 now. While the clone me plays with Katie till she begins to grow from the new babies again, the clone Katie lays me down to play with my cock trying to get it hard again after that massive load I did. She spreads her pussy on my face while sucking on the tip of my cock. It feels like deja vu from this morning, but who's complaining.

As CK (clone Katie) is playing with my enormous cock taller than her while sitting on my face, I can feel her wiggle her hips to hint at me to play with her pussy. So I start to lick the lips

with my long tongue. As I'm licking her, I notice my tongue feels even longer than last time. So I begin to push my tongue up over her stomach between her breasts into her mouth. I was like, Holy shit, I can French her from under her. After a bit, she bit my tongue not hard and rubbed her pussy on my face more to indicate where she wanted it. So I slid it back down, but not before I licked and played with her nipples a bit. After about a few minutes of nipple play, I bring it down more to start pushing it into her pussy. I kept going and moving more into her, rolling my tongue into her womb when she started moaning a bit, and I felt something rub on my tongue. When I figured it out, I could feel my tongue through her stomach with my hand and noticed I was giving her a little pop belly just with the amount of my tongue in her womb. So I start to twirl and whip it around in her, causing more moans and a hard squeeze from her hand on my cock. I could tell I was hitting all the right spots about to make her cum. I kept going until I felt a harder squeeze on my cock, then a full-face soak of her juices all over my face and mouth. I pulled my tongue out and asked, 'Think you're ready for this beast?' She turns her head around with this hungry look.

I said I was still a bit tired from earlier and for her to go for it. She stood up and turned to face me when I noticed her tits had gotten even bigger since she sat on me. They were about the size of a basketball JJ cup, I think. She leaned forward a bit and could almost touch my face with her tits while bent over, trying to get the head to line to her pussy. I help her slowly, turning the tip to touch her pussy lips. She reaches down to spread them open more, making it easier for the head to go in. Now, the head is the size of a massive grapefruit, so it would take a bit when suddenly, I felt it slip in. I was like, 'Okay, going in a lot easier than last time with the original Katie, as she started to slide more and more into her.' She gets a foot and a half in before she steps back a bit, and I stand over me with my dick in her. She slowly comes down, and I can see my head of cock push up further into her and see the bulge climbing up through her stomach to her tits. She gets about another foot in before she stops and starts to rise back up. She starts to ride my rod in about a minute, like a well-oiled piston, up and down. As she goes to town on my cock I can see her tits still growing and her ass. Her tits sit in her lap when she goes down as her ass cheeks are starting to cover my legs; keep in mind there's still about a little over a foot she hasn't taken in yet. She keeps going a little faster each time, and I start to feel my ball churning like they want to release a massive load. I think she feels it and starts to go even faster to the point she is a blur, but her tits are so big they are beginning to rest on me, not moving, and I can feel her ass squish my legs and massive balls.

As I get to the point I'm about to blow, she comes down. I push my cock in her a little further and blow one of many loads. It was so powerful; if her tits and ass didn't weigh her

down enough, she would have flown off. As one stopped, I shot another and another until about 11, just like last time. I watch with every blow her stomach push through her tits, laying on my stomach and chest. She got so tired after that, and with her heavy stomach and ass pulling her down onto my dick, but that was when I noticed she seemed a bit different than the RK (original Katie). She looked taller by a good foot. I looked harder at her and was sure she had to be taller cause her pelvis was resting on mine with my cock entirely in her, but her head was at the same height when she squatted down on me, leaving a foot of cock out. As I was sitting there trying to wrap my head around it, I noticed her belly slowly shrinking as her tits started to balloon out more, and I could see her rise higher as well. She was growing taller. I screamed in my head as she rolled over, pulling me with her keeping my dick in her. Once she was on her back, I sat up on my knees and looked at her legs. They were longer, and her torso was more extended, even with the colossal stomach. She was becoming a giant right before my eyes. She had to be at least 8 feet tall now with tits the size of bean bag chairs and an ass to match. As I watched her stomach shrink some more as she grew bigger, I heard RK let out a loud moan. I saw CM (clone me) was increasing all over, too. He had to be almost 9 feet tall with a cock nearly as tall as me (5'10).

I was somewhat mad that I wasn't growing like that, but I still had an almost 5-foot-long cock can't complain too much. When I looked over at RK, her stomach was enormous. It looked like she was pregnant with a baby elephant; it was huge. As I stared at how big she got, I saw CM sucking on her nipple, which had to be as big as my forearm, while the other was gushing milk out on the ceiling and floor. As I watched, wanting a taste, I got pushed by CK's ass and pussy cause she kept growing. She had to be at least 12 feet tall now. I started to worry if the building was even going to hold her weight when I felt a huge hand grab my cock. She grabbed my cock with one hand, quickly covering 2 feet with just one hand, and pulled me to her pussy. She then hunches over the best she can to push her nipple into my mouth. With a bit of squeeze, milk just gushed into my mouth, almost drowning me. I hurried and swallowed as fast as I could, and with every gulp, I could feel it go through my stomach straight to my cock and balls. I could feel my cock growing bigger and faster with every swallow.

As I kept chugging her milk down, I saw her stomach was flat, and she had stopped growing taller, at least. Her tits are still growing slowly, producing gallons of milk a minute, going straight to my cock while growing inside her pussy. She grew so big I could stand between her legs and play with her clit that was about the size of my head. As I kept sucking, I started to play with her clip making her squirm and pant like she was about to cum. I kept playing till I felt her pussy begin to squeeze my dick, then bam, I was thrown back from the force of her pussy

squirting. She soaked me from head to toe, and a puddle between me and her pussy about 10 feet away. Luckily, I blew into a chair behind me and not the wall. I stood up when I felt the weight of my balls. They were so huge, and I looked up to see my cock. It had to be 7 feet long now, still soft, lying on the floor over my bean bag chair-sized balls. I saw her try to spread her tits apart to see what happened to me when I heard a sudden pop and gush of water across the floor. I looked over at RK to see her water break and give birth to more babies. CM was helping her, and I watched him lay baby after baby by their side. After about eight babies, she passed out for a second. Then I noticed something was different about her once her stomach started to go down a bit. That's when I saw she had grown taller again and had eight tits now. I was mad I wasn't getting any taller when, all of a sudden, I hit my head on the ceiling. I hunched over while telling CM to go over to RK so I could see her eight huge tits up close. As I get over to her, I notice I'm still growing, and my dick is starting to get hard again. As I get closer to her, I begin to hear loud popping noises. I was about to put my mouth on her nipple when I heard popping and groaning noises getting louder. Next thing you know, the building starts to collapse in on itself due to our weight and that of others in the building who are affected by the virus. I hurried and grabbed the babies as we fell, lying on top of RK. After about a few minutes, I lean back, pushing rubble from the building, and look around to see if the clone us are okay, and as I do so, I feel a hand on my cock. I turn my head to see it's not RK's hand cause she is busy playing with her eight boobs. She can't make up her mind what one to squeeze. I look around when I see it's the woman two apartments down or was two apartments down now grabbing my dick.

The woman wasn't as big as RK but did have huge boobs. I tried to push her off cause I wanted to be over with RK to play with her titties, but she didn't let go. She kept trying to put the head of my cock into her mouth with no luck since it was as big as her head. So I picked her up with one hand, which looked funny, like holding a small doll with water balloons hanging off the edge of my index finger. I was like a mini giant, but nothing compared to RK. She was almost double my height, but she had to be to have eight titties. I put her onto my cock and started to slide her up and down. Rubbing her pussy and tits close to my tip. She began to moan, and I could feel her pussy gush over my cock as I started to get close. She could tell I was close and tried to put her mouth on my tip when I slid her up, holding both her legs apart, pushing her pussy up close to my tip, blowing my first enormous load into her tiny pussy. With the first load, she looked nine months pregnant. I laid her down before I popped her with the next load or 13. A few of the loads landed on her, coating her head to toe with thick cum. As she lay there, licking it up off her tits and face, when I noticed she was starting to grow everywhere. First, her tits grew pretty fast, then her ass chunked up before growing taller, but her stomach didn't go down; if anything, it grew bigger right along with the rest of her.

As I sat there in awe, I got hit in the head with liquid. When I wiped my head, I noticed milk, but I wondered where it had come from. I got hit again and saw RK spraying me with milk from one of her eight huge, milk-filled titties. I started to crawl out of the rubble when, suddenly, a bright light enveloped me and her. With a quick flash, we both are in a separate glass room. I stand up and approach the glass wall between us, trying to see if I can break it, but I have no luck. As she tried to get up to help break the wall down, this weird gas filled both rooms, and we both got knocked out. When I came through, I was lying on an icy table and couldn't move. I didn't say any straps on me like an invisible force was holding me down. I tried my best to look around when a bright spot came on, and then I heard loud footsteps coming up to my side. As I was lying there, I could feel something rubbing on my cock before I felt a hard plastic thing go into my penis. Surprisingly, it didn't hurt one bit. I could feel it slide further and further into my penis till it hit my balls. Then I started to feel a huge hand rub up against my stomach before I saw a clear thing go over my face and pump some gas through it, knocking me out again.

When I woke up again, I felt bigger everywhere but more in my cock and balls. Then, the spotlight dimmed a little, and I was able to see what was standing next to me. When my vision cleared, I saw a tall blue giant. She had to be at least 50 feet tall with hands that could almost cover my entire body. I looked closer and saw she had some massive breasts with liquid coming out on the tip. As I was just lost looking at her, another one came into the room, but this time was a male, and I couldn't help but see his dick that was longer than my height, and I was at least 18 feet tall now with balls that put mine to shame. He asked her how I was doing with the new treatment when she told him to see the results himself while pointing to my cock. He then talks about another one who is doing good, making a gesture with his hands out in front of his chest as if piling on a massive chest, and all I can think is that he's talking about Katie. He then asked her if I would be ready to try the final test. She told him very soon, with another shot, that he should be big enough for everyone; as she said that, the clear cover came over my face again, with the gas knocking me out once again. Once I woke up again, I was in a different room, but this time with Katie. When my vision cleared, I saw what that one alien had been talking about with the hand and arm jester earlier. Her tits are enormous. Each tit was at least 15 feet in diameter, and I almost forgot she had 8 of them. She also grew taller. She had to be at least 40 feet tall, nearly the same height as the alien sept; she surprisingly had bigger tits than the one giving me the treatment. As I stood up, I noticed I was much taller. I was taller than Katie this time, and my cock was insanely massive and long. I had to be 45 feet tall now, and my cock had to be 18 feet with balls almost as big as her tits. I could only imagine how big my first load

would be. I could probably inflate Katie and nearly pop her with just one load, and they are heavy. As I felt how heavy they were, I could feel something playing with the head of my cock. I looked over to see Katie rubbing and trying to suck it when an image came on the wall showing the two aliens.

He was going about how their race is dying on their planet. They are unable to reproduce due to all the modifications made to their genes. So that's when they came up with the virus and set it off on multiple worlds to see who, if any, would change for the better. Approximately a billion people live on your planet, but only 100,000 have shown changes from the virus. Out of that, only about a hundred were able to undergo hyper-pregnancy with clones of themselves. Once we saw who could do it, we beamed them to our ship. Did a few more modifications to your genes allow you the ability to get impregnated by us and impregnate our females.

When you impregnate the females, it won't be clones of yourselves this time but instead our race. So, with that said, a male and female alien walked into our room. The male walked over to Katie while the female went straight to my cock. As I watched her go to town on my head, surprisingly able to take it into her mouth, I couldn't help but watch it grow hard and even bigger. She starts to rub it between her tits as she is sucking on it. Her tits were big but not as big as Katie's, and she only had two, not 8, like Katie. But I did notice her nipples were getting hard and long. She then laid me down on my back as she kept my cock between her tits but pushed her long nipple to my mouth when I noticed some blue-looking drop on the end of her nipple. I took my long tongue and licked it off her nipple. It was sweet and sour at the same time, and I couldn't help but latch on and want even more. As I bit on her nipple, the blue milk would gush into my mouth as I gulp it down over and over again. I could feel my stomach starting to bulge out with all the milk when I felt my balls begin to tense up as I was getting close. She pulled her nipple out of my mouth to allow her to rub it faster, waiting for me to blow my massive load. I soon felt the bulge sink into my balls, making them bigger right before I bulked and blew a load so enormous I don't know how she kept it all in her mouth. But she gulped it down repeatedly with every shot I blew as I watched her stomach bulge out bigger and bigger, starting to push away my cock from her mouth and titties. As I blew my final load, she popped off my head and stood up, showing just how big her stomach had become compared to her huge boobs. You would think she was pregnant with a huge litter of children or something, given how big it was.

She stood there rubbing her belly as I watched it start to shrink, and her body started to grow, not in height but in her ass, hips, and tits. She kept rubbing her tits, making some moaning noises as they kept growing. While I was watching, my cock started to get hard again, ready for round 2 with the giant alien. I watched as I saw her nipples start to bloat up to the size of my forearm with blue milk spraying out. As I laid there wishing I could have sex and play with Katie's titties, I was starting to get up when I felt her massive hand grab my cock to pull me over to her as she laid down, spreading her legs open waiting for me to start pushing my cock in her alien pussy. I step back to allow my cock to line up to her pussy lips before I start to dive in. As I got my head in, I could feel every muscle tensing up around my cock as she moaned, going deeper in. I was starting to push in slowly, inch by inch, till I was halfway down my cock length when I started to see her stomach push up bit by bit from the head of my dick. I still had about 8 feet left to push in when I felt her legs wrap around me, nudging me to go deeper and a little faster. So I took the hint and literally just shoved it all in. As I shoved it in, I watched her stomach push way up, hitting her titties as she let out a loud moan spraying her juices around my dick. I started to pull back when I could feel her pussy muscles grip and hold my dick in barely got 2 feet out, so I shoved it back in, making her cum again. As I looked up, I saw her nipples bloat up big before they erupted with tons of blue alien milk spraying gallons by the seconds everywhere. I opened my mouth to try and catch some, and when I got a mouthfull, I swallowed, feeling the warm sensation go down my throat to my stomach. Then it surged to my balls, and I could have sworn they inflated slightly. When I felt her start to relax her grip and calm down from the orgasm, I started to pull out again, but yet again, I got about 5 feet out this time before I started to feel her grip my cock again, but I kept pulling out till I at least got close to 9 feet out half my length. After I got halfway out, I started to push only 3 feet in and out. I started to go faster and faster before I started to add more to the length I was using to fuck her with till I could use the full 9 feet in and out, watching her stomach go up and down with every thrust. I was starting to get close, and so was she squeezing my dick so tight, but I was overpowering her grip to keep pushing in and out. I started to feel my balls tighten up, pulling up close to my dick before I erupted a massive load into her pussy. I kept pumping load after load into her as she kept moaning so loudly while squirting milk everywhere. I watched her stomach go bigger and bigger with every load going into her. Before I knew it, her stomach was so big it started to push back and start to slide out my dick, but luckily it was extremely long to keep shooting my load into her.

When I finally shot my last load into her while the room filled with her milk. Her stomach was huge, almost as big as one of her titties. I pulled out the last three feet that were still in her so she could sit up and take a better look at herself in the mirror that had popped up on the wall next to us. I saw myself and noticed that my balls had grown bigger. It had to be from her milk

like before on earth, but my dick did grow at all like then. As I stood there, I started to notice her tits growing nipples getting puffier as her stomach began to round off bigger and bigger. At that point, one of the alien docs came out to congratulate me on a job well done, impregnating her with multiple babies. I asked how Katie was doing, and if I could go over to her before he stopped me mid-sentence to tell me no, they have another female for me to impregnate as he reached out his hand with a big red pill and a cup. I took the pill and cup and asked what it would do to me. He says it's for you to grow a bit taller and produce more sperm because the next female is a bit taller than most, reaching 80 feet tall. I almost dropped the pill and cup when the female walked in behind him, just towering over him and me.

I asked whether it would be better to grow my dick big enough to pregnant her. He said yes, but this is what she wants since she is the only tall in our race. Most of our race is between 45 and 55 feet tall; she is the only one left at 80 feet, so we agreed to increase your height and sperm volume. I said okay and took the pill with a big swig from the cup, then stood there looking at the 80-foot giant just in awe but noticed her tits weren't all that big even at her size, but her ass was plump. Her ass alone could cover my entire cock without even penetrating her. As I looked at her ass, I felt a warming sensation go through my body, guessing it was the pill kicking in finally. As I looked up at her face, I could see she was becoming happier as I grew bigger; she couldn't wait to start playing with my dick as I continued to grow. As she began to suck on the head of my cock I noticed there was still some milk on the floor from earlier, so I scooped up a hand full and swallowed it. I felt the warmth go straight to my cock and balls, throwing the growth into overdrive, causing the alien to choke with it, shooting straight back into her throat and expanding in her mouth, almost getting stuck. My balls surge to nearly 20 feet in diameter, and my cock is straight to 30 feet long over 8 feet wide, but her hands can still wrap around it somewhat. After the growth slowed down, I noticed I was a little taller than her, now hitting almost 90 feet. I saw the glimmer in her eye, looking at my monster cock now at 40 feet, nearly hitting the floor while standing over her. As I stood there, my monster cock started to harden as I felt the pressure build up in my balls, guessing the pill was kicking in to increase my volume of sperm. When my dick was halfway stiff, she kneeled in front of it, getting ready to give me a blowjob when it stiffened fully in the last second while knocking her back on her ass. As she sat there in shock, I pushed her back more with my dick, making her lay down while spreading her leg open and stepping back to get ready to shove it in her. I noticed how wet her pussy was as I rubbed my cocks head on her lips before slowly pushing it in.

I finally get the head in with a bit of effort when I see her trying to grab air like she is trying to grab the blanket of a bed cause of how tight her pussy is just with the head of my cock.

As I start to push in more, I can hear her suck in air through her teeth as my dick keeps scratching her pussy before I slip on some milk and shove about 7 feet straight into her making her moan and gasp for air in ser pleasure while her pussy tries to gush her juices around my cock. I take my hand to scoop up more of the milk from the floor and rub it on my cock to help lube it with her pussy juices to slide in easier. I push in another 7 to 8 feet more before I notice her tits are growing, but I don't think she even notices yet. If I had to say if she were normal human size, her breasts would have started from barely a cup to now being almost DD cup size. I keep pushing in more as she gasps for air and moans over and over, squirting a ton. When I'm finally all in, her tits have grown more, and I think she finally notices since they are big enough to lay on her face now. As I pull out, she wraps her legs around me to thrust me back in as I pop a load into her. I didn't even know I was close, but it felt great to release some pressure. I felt like I would pop when I realized I didn't after I orgasmed. It was just so much cum in my balls couldn't hold it back anymore kept oozing out into her womb as I watched her stomach start to swell up along with her tits and ass. Her nipples began to grow longer with her tits when they were big enough to reach my mouth. I started to suck on her nipples when I felt her breast start to gush milk into my mouth. As I swallowed, I felt it go straight to my balls more than my dick. With every swallow, I could feel my cum gush more and faster into her pussy, causing her stomach to swell even quicker to the point it pushed her tits out of my mouth. Her stomach had to be big as my balls were now still growing since my dick was still in her. I started to pull out and stand up; when I finally got my cock out of her, it was still gushing cum everywhere. As I watched her stomach grow a little more, I felt a sting on my leg before I started to feel sleepy. When I came through, I was strapped into a chair. Plus, there was a suction device on my dick sucking all the cum my balls were making. As I sat there, the doc came in, looking over my cock before telling me the pill was a success.

I asked when I would fuck another alien, when he cut me off, saying never. I yelled you can't do that; we had a deal to fuck, and what has happened to Katie. Oh, we don't need you to fuck them anymore, and we have other plans for her to produce enough milk and babies as fast as your balls can make sperm now. With the volume of cum you are making, we will suck it out of you. Then inject it into the females to impregnate them, and with as much as you make, we can even start to sell it through the galaxy and make a ton of money. In no time, we'll be back to our normal population and richer than ever, thanks to you two. We never expected to find humans like you two. Now that you have our DNA in you, and with the long lifespan we provide, we keep you sedated with nutrients. You'll live for the next 100 years, making sperm and babies for us or maybe even for other species. Around that time, I started to try to break from my straps when he knocked me out again.
